Spatial Policy Problems:

Spatial Policy Problems of the British Economy Michael Chisholm, Gerald Manners, 2009-06-18 Interest in the geography of economic and social change has grown in Britain over recent years as people have become more aware of regional imbalances and as government influence on the evolution of the country's spatial systems has increased. The processes of spatial allocation are becoming better understood as new techniques of analysis are developed. But weaknesses and inconsistencies in public policies remain and have attracted the attention of workers in various disciplines, particularly geographers. This awareness is reflected in these essays, most of which deal with economic rather than the social problems. They demonstrate the wide range of issues on which geographers can make a relevant contribution.

Policy Integration for Complex Environmental Problems Helen Briassoulis, 2017-07-05 This book proposes a comprehensive conceptualization of policy integration and negotiates pertinent theoretical, methodological, and applied issues from the perspective of selected EU policies: rural development, regional development, transport, social, economic, environmental, water resources, and biodiversity policy.

Actors and Agency in Global Social Governance Alexandra Kaasch, Kerstin Martens, 2015-10-22 *Actors and Agency in Global Social Governance* seeks to advance our understanding of the global dimension of social policy by applying the notion of global social governance on actors, their relations to each other, and their pathways, as well as their footprints of influence in the specific policy fields of social concern in which they are active. Focusing on a broad array of individual and corporate global social policy actors, ranging from internationally operating intergovernmental organizations to state formations and NGOs, the contributions to this volume draw a fuller picture of agency in global social policy than what current accounts provide. It considers the multiple facets of individual scope and legitimacy for a particular actor in conjunction with the configuration of global social governance as characterised by multi-centred and multi-scaled obstacles, as well as diverse forms of collaboration. The volume studies the contextualised actor's range and power in designing, shaping, and facilitating various global social policies. Thus, the contributions discuss the role of particular corporate actors within global social policy structures and assess the impact of a number of key organizations, states, groups, and individuals in the governance of global social policy. At the same time, a variety of social policy fields in which these actors are involved are addressed, including labour market issues, family policy, health policy, education policy, migration issues, and global re-distribution via various forms of development aid or remittances.

Castle, 1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers *The Changing American Countryside* a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective

in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life

Excerpt from book I INTRODUCTION 1 THE SPECIAL PROBLEMS AND GENERAL IDEAS OF SCIENCE A DOUBLE fatality hangs over one who has consecrated his days to science If he would contribute to the advancement of science he must prepare himself first of all by a patient study of the thousands of details which constitute its technique he must learn the results obtained by numberless laborers whose researches tend toward the same aim He must master their conceptions and subject them to a new criticism This work so engrosses the attention of the investigator that he has little time left for casting a glance over the branches of science which are developing beside him Yet this necessity also weighs upon his soul If on the one hand he ought to study special problems on the other he cannot exempt himself from considering the ends set before special research by rising to a general outlook which shall command the view of a broader scientific basis This double necessity causes a conflict of tendencies and this conflict in our system of production results in a loss of time and of work from which the intellectual world suffers Most investigators if they are not rightly directed shut themselves up in a narrow circle and fall into a blind empiricism Others lose themselves in the region of confused generalities while a few finer spirits find the way for themselves and often must win again by fresh efforts that which they should have a right to expect as the outcome of the completed work of their companions in labor But the age of heroes that of Descartes or Leibniz whose genius opened all the doors of science seems closed forever The conquests of the past weigh upon the present and upon the future And if it is permissible to hope that a happier use of our intellectual power
