Reading for Realism Nancy Glazener, 1997 *Reading for Realism* presents a new approach to U S literary history that is based on the analysis of dominant reading practices rather than on the production of texts Nancy Glazener's focus is the

realist novel the most influential literary form of the nineteenth and twentieth centuries a form she contends was only made possible by changes in the expectations of readers about pleasure and literary value By tracing readers collaboration in the production of literary forms Reading for Realism turns nineteenth century controversies about the realist romance and sentimental novels into episodes in the history of readership It also shows how works of fiction by Rebecca Harding Davis Henry James Nathaniel Hawthorne and others participated in the debates about literary classification and reading that in turn created and shaped their audiences Combining reception theory with a materialist analysis of the social formations in which realist reading practices circulated Glazener s study reveals the elitist underpinnings of literary realism At the book s center is the Atlantic group of magazines whose influence was part of the cultural machinery of the Northeastern urban bourgeoisie and crucial to the development of literary realism in America Glazener shows how the promotion of realism by this group of publications also meant a consolidation of privilege primarily in terms of class gender race and region for the audience it served Thus American realism so often portrayed as a quintessentially populist form actually served to enforce existing structures of class and power
