**The Decommissioning Handbook** Anibal Taboas, A. Alan Moghissi, Thomas S. LaGuardia, 2004      **Decommissioning Handbook**, 2005 The Decommissioning Handbook is a technical guide for the decommissioning of nuclear facilities The decommissioning of a nuclear facility involves the removal of the radioactive and for practical reasons hazardous materials to enable the facility to be released and not represent a further risk to human health and the environment This handbook identifies and technologies and techniques that will accomplish these objectives The emphasis in this handbook is on characterization waste treatment decontamination dismantling segmenting demolition and remote technologies Other aspects that are discussed in some detail include the regulations governing decommissioning worker and environmental protection and packaging and transportation of the waste materials The handbook describes in general terms the overall decommissioning project including planning cost estimating and operating practices that would ease preparation of the Decommissioning Plan and the decommissioning itself The reader is referred to other documents for more detailed information This Decommissioning Handbook has been prepared by Enserch Environmental Corporation for the US Department of Energy and is a complete restructuring of the original handbook developed in 1980 by Nuclear Energy Services The significant changes between the two documents are the addition of current and the deletion of obsolete technologies and the addition of chapters on project planning and the Decommissioning Plan regulatory requirements characterization remote technology and packaging and transportation of the waste materials      **Decommissioning Handbook** Enserch Environmental Corporation, United States. Department of Energy. Office of Environmental Restoration, 1994      **Decommissioning Health Physics** Eric W. Abelquist, 2019-12-10 Experienced Guidance on the Technical Issues of Decommissioning Projects Written by one of the original MARSSIM authors Decommissioning Health Physics A Handbook for MARSSIM Users Second Edition is the only book to incorporate all of the requisite technical aspects of planning and executing radiological surveys in support of decommissioning Extensively revised and updated it covers survey instrumentation detection sensitivity statistics dose modeling survey procedures and release criteria New to the Second Edition Chapter on hot spot assessment that recognizes appropriate dosimetric significance of hot spots when designing surveys and includes a new approach for establishing hot spot limits Chapter on the clearance or release of materials highlighting aspects of the MARSAME manual Revised chapter on characterization survey design to reflect guidance in ANSI N13.59 on the value of data quality objectives DQOs Updated regulations and guidance documents throughout Updated survey instrumentation used to support decontamination and decommissioning D D surveys including expanded coverage of in situ gamma spectrometers Revised statistics chapter that includes an introduction to Bayesian statistics and additional double sampling and ranked set sampling statistical approaches More case studies and examples throughout Implement the Surveys Effectively and Avoid Common Pitfalls With more than 20 years of experience as a

practitioner in the decommissioning survey field author Eric W Abelquist prepares you for the technical challenges associated with planning and executing MARSSIM surveys He discusses the application of statistics for survey design and data reduction and addresses the selection of survey instrumentation and detection sensitivity He presents final status survey

Decommissioning Handbook William J. Manion, Thomas S. LaGuardia, 1980 Decommissioning Handbook. First Quarterly Progress Report, May 1--August 27, 1978, 1978 The objectives for this reporting period were to develop data on facilities and equipment at typical DOE owned operated sites and to contact individuals and organizations with decommissioning experience to explore state of the art equipment and methods for decontamination and dismantling Nuclear Energy Services has scheduled meetings in September at the DOE Richland office to meet with other contractors and discuss D and D methods and equipment available Also NES will tour the Hanford facilities to review unique characteristics which may require special treatment or handling A tour of the West Valley NY Reprocessing Plant has also been scheduled During this report period NES prepared drafts of handbook chapters which will be submitted to DOE Results of the discussions mentioned above will be factored into the draft handbook chapters on metal cutting equipment concrete demolition methods and decontamination processes Four handbook chapters are ready for submission to DOE These include estimation of radioactive inventory removal of radioactive metals removal of radioactive concrete and cost estimating procedure

**Decommissioning Health Physics** Eric W. Abelquist, 2001-07-04 Decommissioning Health Physics presents many of the technical issues and challenges that arise during the planning and implementation of decommissioning and decontamination D D projects The focus is on the final status survey performed during the later stages of decommissioning projects It expands upon and provides greater technical detail than Multi Agency Radiation Survey and Site Investigation Manual MARSSIM in areas of survey design strategies Featuring a number of completely worked examples of final status survey strategies the book prepares the reader for the real world application of MARSSIM at D D projects One chapter is devoted to the specific decommissioning concerns relevant to specific facility types power reactors uranium and thorium facilities and sites and universities or other research facilities The book thoroughly discusses practical applications of statistics in the context of decommissioning projects from elementary statistics to hypothesis testing for a number of applications including data comparisons between the regulator and licensee normality testing of the data and survey unit compliance decisions Decommissioning Health Physics will be beneficial for the planners designers and reporters of final status survey results as well as health physics technicians who will benefit from practical chapters on instrumentation and survey procedures

**NMSS Handbook for Decommissioning Fuel Cycle and Materials Licensees**, 2006 The US Nuclear Regulatory Commission amended its regulations to set forth the technical and financial criteria for decommissioning licensed nuclear facilities These regulations were further amended to establish additional recordkeeping requirements for decommissioning to establish timeframes and schedules for the decommissioning and to clarify that financial assurance requirements must be in

place during operations and updated when licensed operations cease Reviews of the Site Decommissioning Management Plan SDMP program found that while the NRC staff was overseeing the decommissioning program at nuclear facilities in a manner that was protective of public health and safety progress in decommissioning many sites was slow As a result NRC determined that formal written procedures should be developed to facilitate the timely decommissioning of licensed nuclear facilities This handbook was developed to aid NRC staff in achieving this goal It is intended to be used as a reference document to and in conjunction with NRC Inspection Manual Chapter IMC 2605 Decommissioning Inspection Program for Fuel Cycle and Materials Licensees The policies and procedures discussed in this handbook should be used by NRC staff overseeing the decommissioning program at licensed fuel cycle and materials sites formerly licensed sites for which the licenses were terminated sites involving source special nuclear or byproduct material subject to NRC regulation for which a license was never issued and sites in the NRC s SDMP program NRC staff overseeing the decommissioning program at nuclear reactor facilities subject to regulation under 10 CFR Part 50 are not required to use the procedures discussed in this handbook
