The Image Makers Source Vol 1:

The Image-maker Harold Spencer, 1975 **A Century of Musicals in Black and White** Bernard L. Peterson Jr., 1993-10-25 This comprehensive reference book provides succinct information on almost thirteen hundred musical stage works written and produced from the 1870s to the 1990s involving contributions by black librettists lyricists composers musicians producers or performers or containing thematic materials relevant to the black experience Organized alphabetically they include tent and outdoor shows vaudeville operas and operettas comedies farces spectacles revues cabaret and nightclub shows children s musicals skits one act musicals one person shows and even a musical without songs In addition to the hundreds of shows independently created produced and performed by black writers and theatrical artists it presents hundreds more representing a collaboration of black and white talents An appendix organizes the shows chronologically and highlights those that were most significant in the history of the black American musical stage An extensive bibliography and indexes of names songs and subjects complete the work **Heresy in Transition** John Christian Laursen, Cary J. Nederman, 2016-04-22 The concept of heresy is deeply rooted in Christian European culture The palpable increase in incidences of heresy in the Middle Ages may be said to directly relate to the Christianity s attempts to define orthodoxy and establish conformity at its centre resulting in the sometimes forceful elimination of Christian sects In the transition from medieval to early modern times however the perception of heresy underwent a profound transformation ultimately leading to its decriminalization and the emergence of a pluralistic religious outlook The essays in this volume offer readers a unique insight into this little understood cultural shift Half of the chapters investigate the manner in which the church and its attendant civil authorities defined and proscribed heresy whilst the other half focus on the means by which early modern writers sought to supersede such definition and proscription The result of these investigations is a multifaceted historical account of the construction and serial reconstruction of one of the key categories of European theological juristic and political thought The contributors explore the role of nationalism and linguistic identity in constructions of heresy its analogies with treason and madness the role of class and status in the responses to heresy In doing so they provide fascinating insights into the roots of the historicization of heresy and the role of this historicization in the emergence of religious pluralism Adélaïde Labille-Guiard Laura Auricchio, 2009 This is an exploration of the life and works of one of revolutionary France s most significant female artists It traces the story of her rise and fall in the context of her tumultuous times *The Idol in the Age of Art* Rebecca Zorach, 2017-07-05 After 1500 as Catholic Europe fragmented into warring sects evidence of a pagan past came newly into view and travelers to distant places encountered deeply unfamiliar visual cultures it became ever more pressing to distinguish between the sacred image and its opposite the idol Historians and philosophers have long attended to Reformation charges of idolatry the premise for image breaking but only very recently have scholars begun to consider the ways that the idol occasioned the making no less than the destruction The present book focuses on

how idols and ideas about them matter for the history of early modern objects produced around the globe especially those created in the context of an exchange or confrontation between an us and a them Ranging widely within the early modern period the volume contributes to the project of globalizing the study of European art bringing the continent's commercial colonial antiquarian and religious histories into dialogue Its studies of crosses statues on columns wax ex votos ivories prints maps manuscripts fountains banners and New World gold all frame Western art simultaneously as an idea and as a collection of real things arguing that it was through the idol that object makers and writers came to terms with what it was that art should be and do
