Moravec, 2019-10-21 We task fewer industries to think about the future than we ask from education In societies where constant change is the norm schools today must prepare students to be successful in environments and contexts that may differ greatly from what we experience today But are we really thinking about the future With contributions from four continents this book reveals a snapshot of some of our best thinking for building new education futures Diverse experiences visions and ideas are shared to help spark new thinking among educators and policymakers provoke conversation and facilitate new ideas for meeting human development needs in a rapidly transforming world Edited by John W Moravec Chapters authored by Leona Ungerer Lisa B Bosman Julius C Keller Audrey Falk Silvia Cecilia Enr quez Sandra Beatriz Gargiulo Mar a Jimena Ponz Robert Thorn Erling N Dahl Einar N Str mmen John W Moravec Pekka Ihanainen Stefania Savva Gabriela Carre o Murillo Erik Mileti *Uncertainty in Teacher Education Futures* Sandy Schuck, Peter Aubusson, Kevin Burden, Sue Brindley, 2018-02-16 This book discusses the use of futures methodologies to examine and critique teacher education and investigate drivers of change in teacher education contexts providing readers with futures tools that they can use to explore curricula and pedagogies It explains futures methods including scenario development and backcasting and illustrates them with examples of research in science technology and mathematics education contexts By allowing the long term influence of current trends to be considered and providing an opportunity to reflect on the present and imagine the future scenarios provoke discussion on the directions that teacher education might take now The book offers insights into the possibilities that might exist for teacher education futures and into how scenario building and planning can be used to inform debates about the present Further it suggests ways in which readers can influence the future of teacher education through understanding the drivers of change Creative Provocations: Speculations on the Future of Creativity, Technology & Learning Danah Henriksen, Punya Mishra, 2023-01-01 This book explores the complex yet critical relationship between technology and creativity specifically in educational contexts Creativity is important for success in today s rapidly changing radically contingent and hyperconnected world This is even more relevant in the context of teaching and learning where the psychological sociological and cultural aspects of human learning confront the challenges of a rapidly changing technologically saturated world Written by some of the foremost thinkers and researchers in the area of creativity and or technology the chapters in this volume examine the impact of recent and future technologies on creativity teaching and learning Individually and collectively they help us develop an

Reed, 2026-01-20 Historians largely understand Native American education through the Indian boarding schools and reservation schools established by the US government during the nineteenth and twentieth centuries But Native Americans taught and learned from one another long before colonization and while white settlers and institutions powerfully influenced Indigenous educational practices they never stopped Native peoples from educating one another on their own terms In this ambitious and imaginatively conceived book Julie L Reed uses Cherokee teaching and learning practices spanning more than four centuries to reframe the way we think about Native American educational history Reed draws on archaeological evidence from Southeastern US caves ethnohistorical narratives of Cherokee syllabary development records from Christian mission schools Cherokee Nation archives and family and personal histories to reveal surprising continuity amid powerful change Centering the role of women as educators across generations in Cherokee matrilineal society the power of land to anchor learning and the significance of language in expressing sovereignty Reed fundamentally rethinks the nature of educational space the roles played by teachers and learners and the periodization imposed by US settler colonialism onto the Indigenous experience *Toward Futuristic Program Planning in Adult Education* Pamela Sue Sadowske, 1991

Education and Technology David W. Kritt, Lucien T. Winegar, 2007-12-05 There are numerous publications about education and technology What is missing is a balanced appraisal of the values and cognitive skills technology promotes and those it devalues This is important for education because the way we teach influences how children think and it is of more general importance for the evolution of society If we wait until these issue are definitively resolved and have noticeable

societal effects it will inevitably be too late Hence the need for informed debate now
