The Powers That Be Scott L. Montgomery, 2010-07-15 Thirty years ago our global energy landscape did not look remarkably different from what it does today Three or four decades from now it certainly will dwindling oil reserves will clash with skyrocketing demand as developing nations around the world lead their citizens into the modern energy economy and all the while the grave threat of catastrophic climate change looms ever larger Energy worries are at an all time high just how will we power our future With The Powers That Be Scott L. Montgomery cuts through the hype alarmism and confusion to give us a straightforward informed account of where we are now and a map of where we re going Starting with the inescapable fact of our current dependence on fossil fuels which supply 80% of all our energy needs today Montgomery clearly and carefully lays out the many alternative energy options available ranging from the familiar like water and solar to such nascent but promising sources as hydrogen and geothermal power What is crucial Montgomery explains is understanding that our future will depend not on some single wondrous breakthrough instead we should focus on developing a more diverse adaptable energy future one that draws on a variety of sources and is thus less vulnerable to disruption or failure An admirably evenhanded and always realistic guide Montgomery enables readers to understand the implications of energy funding research and politics at a global scale At the same time he doesn t neglect the ultimate connection between those decisions and the average citizen flipping a light switch or sliding behind the wheel of a car making The Powers That Be indispensable for our ever more energy conscious age *"The Powers that Be;" or, What is our duty,-to resist or to obey them? A question for the times. A sermon, preached ... December 1st, 1867, on the occasion of the execution of Allen, Gould, and Larkin, for the murder of Policeman Brett Henry CANHAM, 1867*

The Powers That Be Walter Wink, 2010-02-24 In our fast paced secular world God and theology are second class citizens Money politics sports and science seem better suited to the hard realities of our world As the church steeple has been eclipsed by the skyscraper as the centerpiece of the urban landscape so has the divine realm been set aside in favor of more immediate human experience One sad consequence of this shift is the loss of spiritual and theological bearings most clearly evident in our inability to understand or speak about such things If the old way of viewing the universe no longer works something else has to replace it The Powers That Be reclaims the divine realm as central to human existence by offering new ways of understanding our world in theological terms Walter Wink reformulates ancient concepts such as God and the devil heaven and hell angels and demons principalities and powers in light of our modern experience He helps us see heaven and hell sin and salvation and the powers that shape our lives as tangible parts of our day to day experience rather than as mysterious phantoms Based on his reading of the Bible and analysis of the world around him Wink creates a whole new language for talking about and to God Equipped with this fresh world view we can embark on a new relationship with God and our world into the next millennium **The Powers of the Presidency** CQ Press, 2012-10-19 Providing both a historical and contemporary perspective on presidential powers The
