Hubert L. Dreyfus,2017-06-16 This volume presents a selection of Hubert Dreyfus s pioneering work in bringing phenomenology and existentialism to bear on the philosophical and scientific study of the mind Each of the thirteen essays interprets develops and extends the insights of his predecessors working in the European philosophical tradition One of Dreyfus central contributions to reading the historical canon of philosophy comes from his recognition that great philosophers help us to understand the background practices of a culture the practices that shape and embody our most basic understanding of ourselves and the things and situations we encounter in our world Background practices are all too often overlooked completely or else their importance is misunderstood Each chapter in this volume shows in one way or another how a broad range of philosophical topics can only be properly understood when we recognize how they are grounded in the background practices that shape our lives and give meaning to our activities our tasks our normative

That concern about human genetics is at the top of many lists of issues requiring intense discussion from scientific political  
social and ethical points of view is today no surprise It was in the spirit of attempting to establish the basis for intelligent  
discussion of the issues involved that a group of us gathered at a meeting of the International Society for the History  
Philosophy and Social Studies of Biology in the Summer of 1995 at Brandeis University and began an exploration of these  
questions in earlier versions of the papers presented here Our aim was to cross disciplines and jump national boundaries to  
be catholic in the methods and approaches taken and to bring before readers interested in the emerging issues of human  
genetics well reasoned informative and provocative papers The initial conference and elements of the editorial work which  
have followed were generously supported by the Stifterverband fUr die Deutsche Wissenschaft We thank Professor Peter  
Weingart of Bielefeld University for his assistance in gaining this support As Editors we thank the anonymous readers who  
commented upon and critiqued many of the papers and in tum made each paper a more valuable contribution We also thank
