The Scopes Trial:

The Scopes "Monkey" Trial Sabrina Crewe, Michael V. Uschan, 2004-12-15 Looks at the historic 1925 trial in which a Tennessee high school biology teacher was accused of violating state law by teaching Darwin's theory of evolution and discusses the impact on America *The Scopes Monkey Trial* Jim Whiting, 2020-02-04 One of the most famous trials in U.S. History took place in a tiny town in Tennessee in 1925 Dayton was the site of what became known as the Scopes Monkey Trial. The defendant John T. Scopes was accused of violating a recently passed state law. This law made it illegal to teach the theory of evolution. Under most circumstances few people would have paid any attention to the trial. Several of Dayton's leading citizens saw a chance to put their town on the map. They were successful. Two of the country's top lawyers, William Jennings Bryan and Clarence Darrow, soon became involved. Dozens of reporters poured into Dayton from all over the country. It was the first trial to receive live media coverage. Scopes was found guilty. He had to pay a small fine. But the issues about evolution that the trial raised are still debated today. [The Scopes Monkey Trial](#) Charles River Charles River Editors, Charles River, 2017-03-23 Includes pictures. Includes accounts of the trial and excerpts from it. Includes online resources and a bibliography for further reading. Includes a table of contents. I never had any idea my bill would make a fuss. I just thought it would become a law and that everybody would abide by it and that we wouldn't hear any more of evolution in Tennessee. John Washington Butler. In the early 20th century Darwin's theory of evolution was still a relative novelty but it had spurred some Americans to react by preventing it from being taught in schools including in Tennessee which passed the Butler Act to prohibit teaching the theory in a state-funded school. This set the stage for proponents of the theory to challenge the law by having a teacher bring up Darwin's theory in a classroom which is how a little-known substitute teacher named John Scopes had his name attached to one of the most famous cases in American history. Although it is best known as the Scopes Trial or Scopes Monkey Trial even 90 years later the case was intentionally created as a test case and from the beginning it was meant to draw attention not just to the issue but to the small town of Dayton Tennessee itself. In that it succeeded not simply because the case was important but because it brought William Jennings Bryan one of America's most famous politicians to participate. Bryan would square off against renowned lawyer Clarence Darrow who would represent Scopes in the proceedings. While the case was technically challenging a law and proceeded like a normal trial including an appeal to Tennessee's Supreme Court the Scopes Monkey Trial was essentially a national debate on theology, science and each one's place in the classroom. The trial is best known not necessarily for the results but for the rhetorical arguments that were made on each side and for the manner in which Darrow and Bryan squared off. In perhaps the most famous scene of the entire affair Darrow actually cross-examined Bryan himself. Naturally the case was politically charged on all sides and even the judge was conspicuously biased against Scopes' defense but Scopes successfully appealed the fine at the Tennessee Supreme Court. Still the issue remained heated even after especially when Bryan died shortly after the trial. The Scopes

Shapiro, 2013-05-21 In Trying Biology Adam R Shapiro convincingly dispels many conventional assumptions about the 1925 Scopes monkey trial Most view it as an event driven primarily by a conflict between science and religion Countering this Shapiro shows the importance of timing the Scopes trial occurred at a crucial moment in the history of biology textbook publishing education reform in Tennessee and progressive school reform across the country He places the trial in this broad context alongside American Protestant antievolution sentiment and in doing so sheds new light on the trial and the historical relationship of science and religion in America For the first time we see how religious

objections to evolution became a prevailing concern to the American textbook industry even before the Scopes trial began Shapiro explores both the development of biology textbooks leading up to the trial and the ways in which the textbook industry created new books and presented them as responses to the trial Today the controversy continues over textbook warning labels making Shapiro's study particularly as it plays out in one of America's most famous trials an original contribution to a timely discussion The Scopes Trial Michael Burgan, 2011 In 1925 John T Scopes was found guilty of teaching evolution to his high school biology class in Dayton Tennessee In a legal battle between conventional and contemporary beliefs the trial of the century unfolded In The Scopes Trial Faith Science and American Education explore the clash between supporters and opponents of the teaching of human evolution and their conflicting perspectives Book jacket
