**Globalistics and Globalization Studies: Theories, Research & Teaching** Leonid Grinin,Ilya Ilyin,Andrey Korotayev,2013-09-30 This is the second issue of the new series titled Globalistics and Globalization Studies Globalistics may be regarded as a sort of systemic and more or less integrated core within Global Studies At present Global Studies function in two main dimensions in the research of global political economic cultural and social processes on the one hand and in the realm of teaching manifesting themselves in the creation of various Global Studies programs and courses for university students who learn to see the world in its entirety and variety The second

dimension is immensely important as the contents of such programs and courses may determine how the world will be comprehended by those people who may decide its fate in a decade or two This dualistic nature of Global Studies has determined the general direction of our anthology that comprises both the theoretical dimension of Global Studies and their application to the teaching process The anthology consists of three parts presenting a wide range of views on the meaning of the contemporary epoch the past and the future of some important global processes as well as the problems and successes in the teaching process of Global Studies Part 1 Globalization in Historical Retrospective Part 2 Globalistics Global Studies and Global Processes Part 3 Teaching Global Studies In the present anthology one can find perceptions of globalization by a number of famous scholars from different countries of the world Ervin Laszlo Christopher Chase Dunn and others but one can also get to know rather peculiar visions of globalization by Russian scientists and educators *Development Perspectives for the Wider European Territory* Council of Europe,1995 Wider Perspectives on Global Development UNU-WIDER,2005-09-09 This volume brings together some of the most influential scholars in development economics to explore how to improve the well being of the poor how to design effective structures and institutions for poverty reduction and what the role of economic political and social dimensions are and should be in global development Issues addressed include globalization both its governance and a historical perspective inequality of income and the potential for conflict trade and labour practises in a transitional and developing world and the natures and characteristics of institutions and markets

**Foreign Aid and Bangladesh** Mohammad Mizanur Rahman,2024-08-28 Foreign Aid and Bangladesh offers a rich combination of aid history from the evolution of aid as a global agenda after WWII to the rise of different multilateral bilateral and emerging donors and their policy shifts and a nuanced perspective of aid partnerships at the country level Drawing on first hand experiences and insights the author deeply investigates the realities of a longstanding aid recipient Bangladesh and argues that without a political economy approach one cannot understand the realpolitik of development aid As an emerging economy from the Global South Bangladesh has been a longstanding partner and recipient of international aid since 1971 Bangladesh has also been active in the global discussions leading to redefining the new narrative and arguments for the new aid regime since the beginning of this century Building on the analysis of Bangladesh s aid relations the book shows that there has not been any qualitative shift in aid behavior in the new aid regime that set new norms after the end of the Cold War to ensure recipients ownership and welcomed an expanding aid landscape by integrating emerging economies from the Global South for achieving better development results The book analyzes the role of different actors in the development partnership both traditional and emerging donors such as China and India and their partnership practices It examines different forms of aid and their changing perspective particularly technical assistance Based on more than two decades of research and profound insider observations the book debunks the myth that Southern providers could be more benign to their partners The arguments placed in the book expose that there is no difference between traditional and

emerging donors in ensuring donors business and strategic interests While donors continue to ensure their interests in providing aid the Realpolitik of the situation in the recipient country shows that there is a specific economic and political agenda in pursuing aid Presenting a comprehensive picture of Bangladesh s aid partnership through the lens of new development partnership principles and narratives of development aid this book will be of interest to scholars and researchers of aid and development studies and political science as well as South Asian Studies Donor officials civil servants and national and international policy communities will also benefit from this book
