aspects of social sciences management sociology and education to better understand today's society and social life in the Asian context. The book identifies trends, impacts, and implications of disruptive technologies for business and socio-economic development, as well as strategic advantage on different levels of business and administration. Covering topics that include e-commerce, green management, information technology, economic growth, and distance learning, this book is essential for economists, academicians, government officials, policymakers, social scientists, managers, leaders, behavioral scientists, academicians, researchers, and students.

Parallel Computing: Technology Trends Ian Foster, Ludek Kucera, Wolfgang E. Nagel, Frans Peters, 2020-03-15. The year 2019 marked four decades of cluster computing, a history that began in 1979 when the first cluster systems using Components Off The Shelf (COTS) became operational. This achievement resulted in a rapidly growing interest in affordable parallel computing for solving compute-intensive and large-scale problems. It also directly led to the founding of the ParCo conference series. Starting in 1983, the International Conference on Parallel Computing (ParCo) has long been a leading venue for discussions of important developments, applications, and future trends in cluster computing, parallel computing, and high-performance computing. ParCo2019, held in Prague, Czech Republic, from 10-13 September 2019, was no exception. Its papers, invited talks, and specialized mini-symposia addressed cutting-edge topics in computer architectures, programming methods for specialized devices such as field-programmable gate arrays (FPGAs) and graphical processing units (GPUs), innovative applications of parallel computers, approaches to reproducibility in parallel computations, and other relevant areas. This book presents the proceedings of ParCo2019 with the goal of making the many fascinating topics discussed at the meeting accessible to a broader audience. The proceedings contain 57 contributions in total, all of which have been peer-reviewed after their presentation. These papers give a wide-ranging overview of the current status of research, developments, and applications in parallel computing.

Proceedings of the International Scientific Conference "Smart Nations: Global Trends In The Digital Economy" Svetlana Igorevna Ashmarina, Valentina Vyacheslavovna Mantulenko, Marek Vochozka, 2022-02-04. This book contains contributions from an international scientific conference, Smart Nations: Global Trends In The Digital Economy, which was organized by the State University of Management Moscow. By presenting international research on the issues of the Smart Nations concept, this book includes topics such as state and legal aspects of digital transformation of management systems, new technologies in the digital environment of the information society, and smart economy as a new reality. The conference proceedings cover legal, informational, technological, and other aspects of socio-economic development in the context of digital innovations. This work addresses theoretical and practical aspects by studying the phenomenon of Smart Nations, which requires understanding the modern information technologies, big data analysis, distributed registry management, new microprocessor technologies, and broadband data transmission technologies in terms of their usefulness and accessibility to any representative of humanity.

Workforce shortage in a digital era. Can 100% remote work attract more qualified candidates? Huong Hoang

Thien,2023-05-25 Master s Thesis from the year 2023 in the subject Leadership and Human Resources Recruiting grade 1 0 language English abstract What will happen if there aren t enough talents to fill the market in the future due to the demographical change This study focuses on the potential of offering 100% remote work to counteract the workforce shortage in Germany An empirical study has been conducted as an online survey to gain an overview of Germany s 100% remote job market In a fast changing world digital transformation has become an evitable process for companies to adapt to new technologies and market trends The digital transformation in Germany has been significantly impacted by the COVID 19 pandemic positively and negatively On the one hand the pandemic forced German companies to embrace new technology more quickly and adapt to remote work However on the other hand it pointed out Germany s weaknesses in digital infrastructures and cybersecurity Additionally many German companies face a shortage of workers due to digital transformation Another reason that causes workforce shortage is demographical change Companies cannot operate their business correctly increase revenue or drive innovations to survive in a competitive market without suitable candidates Furthermore the digital revolution shaped the current digital generations as potential workers exhibit different digital behaviors and preferences Therefore companies must know them and their work preferences to fill the workforce shortage gap Remote working as a sub trend of the mega trend New Work has become the new standard for workers especially since the pandemic However there aren t any specific regulations regarding remote work in Germany yet In general remote work provides workers e g more freedom and a better work life balance Nevertheless remote work also has the downside such as workers experiencing isolation and loneliness due to the lack of social contact with co workers less productivity outside of the office etc For companies offering remote work gives them complete access to the talent pools including freelancers as external workers reducing costs due to fewer offices being more attractive to job seekers But on the other side remote leadership has become a big challenge for leaders Furthermore companies have to deal more with cyber security When everything s going remotely companies have become an easier target of cyber attacks

Labor Market Tightness in Advanced Economies Mr. Romain A Duval,Romain Duval,Yi Ji,Longji Li,Myrto Oikonomou,Carlo Pizzinelli,Mr. Ippei Shibata,Alessandra Sozzi,Marina M. Tavares,2022-03-31 Two years after the onset of the COVID 19 pandemic a puzzle has emerged in several advanced economies unfilled job vacancies have increased sharply even though employment has yet to fully recover This note sheds light on three contributing factors namely barriers to returning to work changing worker preferences away from certain types of jobs and sectoral and occupational job mismatch The note also assesses the impact of labor market tightness on wage growth showing that it has been large for low pay jobs but milder overall Bringing disadvantaged groups of workers into the labor force including by controlling the pandemic itself would ease labor market pressures while amplifying the recovery and making it more inclusive
