The Freudians Edith Kurzweil, 2018-04-27 Every country unconsciously creates the psychoanalysis it needs says Edith Kurzweil *Freudians* everywhere even the most orthodox are influenced by national traditions interests beliefs and institutions In this original and stimulating book Kurzweil traces the ways in which psychoanalysis has evolved in Austria England France Germany and the United States The author explains how psychoanalysis took root in each country outlines the history of various psychoanalytic institutes and describes how Freudian doctrine has been transmuted by aesthetic values behavioral mores and political traditions of different cultures The Germans for example took Austrian humanism and made it scientific The British developed object relations French psychoanalysts emphasized linguistics and structuralism and developed an abiding fascination with text language subtext and plot structures In her new introduction Kurzweil reexamines her argument that countries develop their own psychoanalysis according to their needs She describes evidence supporting her theories and why they continue to hold true today She also discusses what led her to write this book initially *The Freudians* is a major work in confirming the importance of psychoanalytic thought across national and cultural boundaries

Introspection in Biography Samuel H Baron, Carl Plutsch, 2019-09-30 Most of the essays offered here are revised versions of papers first prepared for an invitational conference on *The Psychology of Biography* held in Chapel Hill November 12-14 1981 The conference which was funded by the National Endowment for the Humanities brought together twelve biographers including historians literary scholars political scientists and psychoanalysts each of whom had composed an introspective essay describing his experience of the biographical process Each participant was invited to proceed in whatever manner seemed appropriate to him but all were encouraged as well to address a number of questions that we

regard as central to this inquiry Why did I decide to write a biography and how did I select a subject How did I achieve insight into the internal life of my protagonist In what ways did I put my personal stamp on the portrait I produced As a result of protracted involvement with the subject did the latter influence my life and if so how The contributors have responded to these questions in varying degrees but they provide evidence enough to permit for the first time some systematic treatment of these and subsidiary questions On the other hand each paper is marked by an individual approach and style Taken as a whole these uncommonly intimate and self revealing essays illuminate many aspects of the biographical enterprise The collaborative character of the symposium deserves emphasis It began with the request that the contributors to be all address a number of specific questions It continued with the cooperation of a majority of the contributors with a psychoanalyst or clinical psychologist as an aspect of the preparation of their papers More on this in a moment It went a step further at the conference itself which served as a forum for an exchange of views so stimulating that it prompted the participants to undertake to revise their papers Moreover the conferees were so impressed by the frequent flashes of illumination most often touched off by Dr George Moraitis that they asked him to compose an additional essay an afterword for this volume to bring to a wider public the workings pitfalls and potentialities of the collaborative method
