1998 *The Grid and the Park* not only revitalized studies on the history of Buenos Aires but also laid the foundation for a specific type of cultural work on the city an urban perspective for cultural history as its author would describe it that has had a sustained impact in Latin America Public space embodied in the grid of city blocks and the park system here appears as a particularly productive category because it encompasses dimensions of the material city politics and culture which are usually studied separately From Domingo Faustino Sarmiento s figurations of Palermo Park in the mid nineteenth century to Jorge Luis Borges s discovery of the suburb in the 1920s from the modernization of the traditional center carried out by Mayor Torcuato de Alvear in the 1880s to the questioning of that centrality by the emergence of the suburban barrio the book weaves the changing ideas on public space with urban culture to produce a new history of the metropolitan expansion of Buenos Aires one of the most extensive and dynamic urban centers of the early twentieth century
