## Structure Of Space:

**The Large Scale Structure of Space-time** Stephen Hawking, George Francis Rayner Ellis, 1973 Einstein's General Theory of Relativity leads to two remarkable predictions first that the ultimate destiny of many massive stars is to undergo gravitational collapse and to disappear from view leaving behind a black hole in space and secondly that there will exist singularities in space time itself These singularities are places where space time begins or ends and the presently known laws of physics break down They will occur inside black holes and in the past are what might be construed as the beginning of the universe To show how these predictions arise the authors discuss the General Theory of Relativity in the large Starting with a precise formulation of the theory and an account of the necessary background of differential geometry the significance of space time curvature is discussed and the global properties of a number of exact solutions of Einstein's field equations are examined The theory of the causal structure of a general space time is developed and is used to study black holes and to prove a number of theorems establishing the inevitability of singularities under certain conditions A discussion of the Cauchy problem for General Relativity is also included in this 1973 book *The Large Scale Structure of Space-Time* Stephen W. Hawking, G. F. R. Ellis, 1973 This 1973 book discusses Einstein's General Theory of Relativity and its predictions concerning black holes and singularities in space time itself *Social Structure, Space and Possession in Tongan Culture and Language* Svenja Völkel, 2010 This interdisciplinary study investigates the relationship between culture language and cognition based on the aspects of social structure space and possession in Tonga Polynesia Grounded on extensive field research Volkel explores the subject from an anthropological as well as from a linguistic perspective The book provides new insights into the language of respect an honorific system which is deeply anchored in the societal hierarchy spatial descriptions that are determined by socio cultural and geocentric parameters kinship terminology and possessive categories that perfectly express the system of social status inequalities among relatives These examples impressively show that language is deeply anchored in its cultural context Moreover the linguistic structures reflect the underlying cognitive frame of its speakers Just as several cultural practices sitting order access to land and gift exchange processes the linguistic means are not only expressions of stratified social networks but also tools to maintain or negotiate the underlying socio cultural system *The Large Scale Structure of Space-time* Stephen Hawking, 1974 **The Structure of Space** Joan Solomon, 1973 *The Structure of Specialization and Trade in the Space Economy* Tönu Puu, 1983 **The Week-end Review of Politics, Books, the Theatre, Art and Music**, 1930 **Annals of Mathematics**, 1930 Founded in 1884 Annals of Mathematics publishes research papers in pure mathematics *Further Investigations on the Structure of Crystals Belonging to the Scheelite Group* Lars Vegard, Alf Refsum, 1928 *The Concepts of Space and Time* M.
