Samms Ph D, 2005-08 Have you ever pondered why some troubled marriages succeed while other seemingly fairytale marriages flounder and fail According to Dr Robert O A Samms the key to a successful marriage is not the absence of conflicts or problems but rather the presence of the appropriate strategies to resolve them In *Making Marriage Meaningful* Dr Samms examines the dynamic inner workings of a modern family to determine its strengths and weaknesses as well as its successes and failures All of these elements must be analyzed in order to improve a marriage The real life situations described in the book also give those couples contemplating marriage some very sound principles to ponder *Making Marriage Meaningful* suggests practical workable strategies for couples in troubled marriages and for happily married couples seeking a greater understanding of the marital relationship The book is also helpful for single separated and

Adult Development Calvin A. Colarusso,Robert Allen Nemiroff,Robert A. Nemiroff,1981-07-31 This volume is about the normal development of adulthood as well as its vieissitudes and the contributions of such development to psycho pathology The authors are psychoanalysts of great dinieal skill and perceptiveness but while their focus is consistently a psychodynamie one their conceptualizations about adult developmental

processes are applicable to virtually all kinds of therapy. It is extraordinary how little attention has been paid to the effects of adult developmental experience on mental development. Obviously mental structures are not static after the profound experiences of childhood and adolescence nor are they merely a template upon which adult experiences are processed. The authors clearly demonstrate that current adult experience always adds to and interacts with existing mental structure which is itself the result of all preceding development. After a first section in which they examine life cycle ideas on development from antiquity to the present they present their own work as it relates to adult experience and adult development. Their hypotheses about the psychodynamic theory of adult development are particularly creative and an enormous contribution to the psychiatric literature and the clinical understanding of patients. Consistent with their views that development in adulthood is an ongoing and dynamic process they elaborate their ideas that childhood development is focused primarily on the formation of psychic structure while adult development is concerned with the continued evolution of existing structure and its use.

Wrestling with Love Samuel Osherson, 1992. In *Wrestling with Love* psychologist Sam Osherson, author of the highly acclaimed *Finding Our Fathers*, reveals how men in our culture struggle to achieve intimacy in their relationships even as strong messages about masculinity demand that they hide their desire for attachments. Osherson begins by offering a startling observation based on his extensive experience with men: the desire to connect and the impulse to shun intimacy often arise at the same time. Osherson looks at how this ambivalence undercuts men at every stage of their lives from boyhood through grandfatherhood and offers concrete, workable advice for how men can free themselves from these conflicts.
