Harrell,2024-05-02 This book seeks to identify and describe all the rocks and minerals employed by the ancient Egyptians using proper geological nomenclature and to give an account of their sources in so far as they are known The various uses of the stones are described as well as the technologies employed to extract transport carve and thermally treat them **The Geographical Journal** ,1930 Includes the Proceedings of the Royal geographical society formerly published separately

classified as hotspots due to improvements in climatic conditions Nigeria and Lebanon are also no longer classified as hotspots due to some improvement in the economic situation and a reduction in the intensity of military operations respectively Although these countries are no longer considered hotspots for the outlook period future economic and conflict related shocks or climatic shifts could lead to their reclassification For the outlook period funding for food and nutrition assistance falls critically short Funding for humanitarian assistance must not be reduced Instead urgent assistance should be scaled up to protect livelihoods and improve food access across all hunger hotspots This report outlines country specific recommendations for urgent emergency responses as well as anticipatory actions to meet existing humanitarian needs and implement short term protective interventions before new crises emerge The report focuses on the most severe and deteriorating acute hunger situations but it does not represent all countries territories experiencing high levels of acute food insecurity
