The Origin:

The Origin of Man Carveth Read, 1925 Conflicting Models for the Origin of Life Stoyan K. Smoukov, Joseph Seckbach, Richard Gordon, 2023-03-14

Conflicting Models for the Origin of Life provides a forum to compare and contrast the many hypotheses that have been put forward to explain the origin of life. There is a revolution brewing in the field of Origin of Life in the process of trying to figure out how Life started; many researchers believe there is an impending second creation of life, not necessarily biological. Up to date understanding is needed to prepare us for the technological and societal changes it would bring.

Schrodinger's 1944 "What is life?" included the insight of an information carrier which inspired the discovery of the structure of DNA. In Conflicting Models of the Origin of Life, a selection of the world's experts are brought together to cover different aspects of the research from progress towards synthetic life, artificial cells and sub-cellular components to new definitions of life and the unexpected places life could have emerged. Chapters also cover fundamental questions of how memory could emerge from memoryless processes and how we can tell if a molecule may have emerged from life. Similarly, cutting edge research discusses plausible reactions for the emergence of life both on Earth and on exoplanets. Additional perspectives from geologists, philosophers and even roboticists thinking about the origin of life round out this volume. The text is a state of the art snapshot of the latest developments on the emergence of life to be used both in graduate classes and by citizen scientists. Audience: Researchers in any area of astrobiology as well as others interested in the origins of life will find a modern and current review of the field and the current debates and obstacles. This book will clearly illustrate the current state of the art and engage the imagination and creativity of experts across many disciplines.

The Origin of Civilisation and the Primitive Condition of Man Sir John Lubbock, 1889 The Human Origins Valentin Matcas, 2016-04-20

There is more to the human origins development intelligence and civilization than the epic debate Creationism versus Evolution simply because there is more to the human condition than what authorities and ideologies want you to believe. Therefore when you study the human origins you have to search beyond the moment when the first humans had detached from the firmament or previous species since there are other significant events in humanity's lifespan and achievement defining its specific timeline. While you have to study everything otherwise you risk understanding these significant events only from simplistic empirical or ideological perspectives ending up learning what you already know while following the crowd throughout unending debates. Since you want the accurate truth because you already know all theories, beliefs, speculations and debates regarding the human origins. And this is why when you study the human origins you expect to understand everything about the origins of life, the nature and origins of this world, the nature of the human higher self and intelligence, the origins and debut of the human consciousness and human intelligent reasoning along with all details related to the Creator of this entire world of Life and of humanity. Additionally it is relevant to know how all these affect you personally and how they affect your family, your genetic line and your nation, how

your family and genetic line originate where and how it happened under what circumstances and with what status and privileges for you for your family for your nation and for the humankind And this is exactly what we cover throughout this book in all details and from all perspectives This book studies the human origins along with the origins of life human intelligence human species human development human society human current civilization along with various past civilizations of Earth integrating humans their origins and their original and current conditions in an elaborate comprehensive model
