With this text Shaffer and Platt provide an alternate presentation and organization of material for an introduction to programming in Turbo Pascal Emphasizing subprograms in the beginning and the object oriented paradigm later this new approach introduces functions and one repetitive control structure first then slowly adds other structures Students are motivated through the use of a chapter problem to demonstrate concepts which is formalized towards the end of each chapter This gives students substantial yet understandable examples of structures presenting a more realistic picture of problem solving and program development Abstraction the underlying theme of the text is demonstrated with control structures data types subprograms and the object oriented paradigm Descriptions of nine subfields of computer science are integrated into the text The text meets all criteria of the CS1 course several from CS2 and related knowledge units
