healthy burgeoning one Within the past 10 to 20 years numerous articles and books have been published and the field can
now be described as emerging with an identity of its own No longer can child psychopathology be viewed simply as a
downward extension of adult psychopathology Rather children must be viewed as children not as miniature adults Such a
situation requires that issues of child psychology and developmental psychology be intimately considered when delineating
the problems of children Such a focus has guided our efforts in soliciting contributors and topics for this volume All
contributors are active researchers and clinicians in the area of child psychopathology and all are acutely aware of the
special considerations of child and developmental psychology as they relate to child behavior problems Further all
contributors are empirically minded consequently the various chapters are data based and represent the most up to date
knowledge available However since research based knowledge is more abundant in some topic areas than in others the
