The Amazon Factor William Wise, 1982      **Cultural Forests of the Amazon** William Balée, 2013-08-20 Winner of the Society for Economic Botany's Mary W Klinger Book Award Cultural Forests of the Amazon is a comprehensive and diverse account of how indigenous people transformed landscapes and managed resources in the most extensive region of tropical forests in the world Until recently most scholars and scientists as well as the general public thought indigenous people had a minimal impact on Amazon forests once considered to be total wildernesses William Balée's research conducted over a span of three decades shows a more complicated truth In Cultural Forests of the Amazon he argues that indigenous people past and present have time and time again profoundly transformed nature into culture Moreover they have done so using their traditional knowledge and technology developed over thousands of years Balée demonstrates the inestimable value of indigenous knowledge in providing guideposts for a potentially less destructive future for environments and biota in the Amazon He shows that we can no longer think about species and landscape diversity in any tropical forest without taking into account the intricacies of human history and the impact of all forms of knowledge and technology Balée describes the development of his historical ecology approach in Amazonia along with important material on little known forest dwellers and their habitats current thinking in Amazonian historical ecology and a narrative of his own dialogue with the Amazon and its people
