prosody and the acquisition of segments and prosody The various articles provide new empirical data on production perception sound change first and second language learning rhythm and intonation presenting a state of the art overview of research in laboratory phonology centred on Romance languages The Romance data are used to test the predictions of a number of theoretical frameworks such as gestural phonology exemplar models generative phonology and optimality theory The book will constitute a useful companion volume for phoneticians phonologists and researchers investigating sound structure in Romance languages and will serve to generate further interest in laboratory phonology
