Tough Talk:

Global Power of Talk Fen Osler Hampson, I. William Zartman, 2015-11-17 The Global Power of Talk explores the power of negotiation and diplomacy in US foreign policy at a critical juncture in US history Beginning with the failure of US diplomacy in relation to Saddam Hussein's regime in the 1980s it shows how a series of diplomatic blunders has laid the foundations for the uninhibited use of gun power over talk power in the last two decades It critically examines missed opportunities in America's handling of the Israeli Palestinian conflict in both the Clinton and George W Bush administrations In a provocative conclusion the authors argue that the United States can and should negotiate with the so called unengageables like Iran North Korea and Al Qaeda in order to find ways to defuse underlying tensions in the global system

That Old Devil Called God Again Archbishop Jonathan Blake, 2014-08-29 Religion has brought the world to the brink of meltdown That Old Devil Called God Again shows how defenceless we are from the invading power of religious indoctrination to which Jesus fell victim From childhood like unprotected computers the predatory viruses of other people's beliefs and dogmas invade us until we emerge as adults unaware of how we have been infected The Rwandan genocide Omagh 9 11 suicide bombings Westgate and the Syrian carnage join the indictments against God Religion stands charged with contaminating our cultural development and impeding our moral aspirations This book gives us a chance to carry out a thorough virus scan to discover who we really are be given the chance to think anew and choose our beliefs The toxic nature of religious teaching is exposed and our basic assumptions and ideas are challenged with fresh and radical thinking that empowers and liberates us to become more fully human While laying siege to religion this book yet presents a passionate and positive call for a full and creative engagement with life and a vibrant spirituality

Methods of Exploring Emotions Helena Flam, Jochen Kleres, 2015-03-24 Gathering scholars from different disciplines this book is the first on how to study emotions using sociological historical linguistic anthropological psychological cultural and mixed approaches Bringing together the emerging lines of inquiry it lays foundations for an overdue methodological debate The volume offers entrancing short essays richly illustrated with examples and anecdotes that provide basic knowledge about how to pursue emotions in texts interviews observations spoken language visuals historical documents and surveys The contributors are respectful of those being researched and are mindful of the effects of their own feelings on the conclusions The book thus touches upon the ethics of research in vivid first person accounts Methods are notoriously difficult to teach this collection fills the gap between dry methods books and students need to know more about the actual research practice
