Boco,Joseph Christian A.,2018-03-13 Bachelor Thesis from the year 2018 in the subject Leadership and Human Resources Miscellaneous University of Santo Tomas College of Commerce and Business Administration course Human Resource Development Management language English abstract The Coworking space phenomenon is rapidly growing across the countries of North America Europe and Asia Owing to its functional work environment it offers coworkers a

collaborative atmosphere that makes them more involved at work The research study aims to describe the causal relationship of workplace design to perceived work performance and to employee engagement and collaborative capability as mediating variables through the use of Structural Equation Modeling SEM A total of 350 coworkers aged 18 60 years old from 27 different coworking spaces in Metro Manila Philippines participated in the study The findings of this research revealed that workplace design has no direct effect on perceived work performance hence perceived work performance improves when coworkers are more engaged and have better collaborative capability Nonetheless the rest of the hypothesized premises were affirmed in the result of this study This paper can help the HR managers and the business centers to create a more flexible and constructive workplace setting for their employees Further the results can be used as a basis for the fundamental shift of the traditional workspace into a new creative workplace *Coworking Atmospheres* Alexandra
