Law: Politics and Values Louis Henkin,2023-11-27 This volume derives from a series of lectures delivered as the general

course at the Hague Academy of International law in July 1989 Like those lectures this volume does not pretend to provide a

complete treatise covering all international law Rather it offers a particular perspective on the principal subjects of

traditional international law elaborates new developments and dares reexamine assumptions and premises The book is built

on three themes The first addresses law as politics and international law as the law of a political system now comprised of

more than 180 separate independent states The essential autonomy of states accounts for the political as well as economic

and cultural heterogeneity in a pluralist and fragmented system and international law as its common denominator of

normative expression A second theme explores change in international law as reflecting change in the values and purposes of

the international political system It traces the pursuit through law of the traditional ideal of the state system to secure every

state s right to realize its own agenda through its own institutions and the superimposed contemporary purpose to promote

individual human rights and welfare in every society The third theme perceives a movement in the law from conceptualism to

functionalism from logical deduction out of abstract principles to pragmatic attention to practical needs and solutions to new

and old human problems Each of these themes dominates in several chapters but the other themes are not absent from any

of them Each will add a fresh perspective and contribute to understanding the nature and operation of international law in

the international political system at the turn of a new century **Complete Public Law** Lisa Webley,Harriet Samuels,2021
