The Laura (Riding) Jackson Reader Laura (Riding) Jackson, Elizabeth Friedmann, 2005 In a single volume the essential work of a major Modernist poet and thinker Some see Laura Riding and Laura Riding Jackson as virtually two separate writers the former a strikingly original Modernist poet and critic the latter a supposedly reclusive thinker on man and woman language meaning and truth However encountering her work in this rich cross section one discovers a remarkable consistency of theme developing throughout from the earliest poems and stories to the post poetic writings of her final years The selections presented here span sixty four years 1923 1987 and include famous works of poetry and prose some long out of print or difficult to find significant lesser known writings and an important previously unpublished late essay Body Mind and the Linguistic Ultimate

Agon Anirudh Sridhar, 2026-02-27 Agon Poetry's Challenge to the Mathematization of Reality narrates the battle for truth telling authority between poetry and mathematics in the 1920s 1960s Analysing subversive uses of mathematical metaphors in British and American poetry it argues that modernism posed the last serious challenge to mathematics whose authority to determine for all the true nature of reality had grown steadily from Newton to Einstein The book paints William Blake's defiance of the Enlightenment as the background or emblem to the modernist resistance whose main protagonists were William Empson Laura Riding Charles Olson W B Yeats and Michael Roberts among others Introducing a novel paradigm of criticism the agon to interdisciplinary study in the humanities Anirudh Sridhar traces the rise of mathematics from the seventeenth century onwards and shows how it supplanted philosophy poetry and the other arts as the language in which reality would be described and comprehended He explores from the agonistic paradigm the role of calculus quaternions Riemannian manifolds non Euclidean geometry analysis mathematical logic and more Extensive close readings of mathematical poems show how they critique the ways in which mathematical tools reduce phenomena and abstract the world of experience These readings bring out the formal performative and reflexive ways in which such poems act as defences of poetry's ability to achieve fidelity to experience and a richer picture of reality Rather than posing poetry as a passive receptacle of mathematical ideas the agon allows for an intense contestation of poetic and mathematical modes and their claims to truth through careful attention to the playfulness and subversiveness animating cross disciplinary interaction
