The Limits To Satisfaction:

The Limits to Satisfaction: On Needs and Commodities William Leiss,1978

Limits to Satisfaction William Leiss,1988

At a time when the supply of resources is a problem William Leiss analyses demand and consumption Why do we need so much Does the ability to choose from such a wide range of commodities give us more satisfaction Why do we accept being pushed into buying products about which we know little because they promise to give us a particular characteristic freshness happiness sex appeal

Happiness and the Limits of Satisfaction Deal Wyatt Hudson,1996 In classical and medieval times happiness was defined as well being a notion that included moral goodness Today happiness is most often defined as well feeling and identified with subjective states such as satisfaction and peace of mind Deal Hudson argues that the prevailing view is dangerous in politics as well as ethics creating individuals with no other sense of obligation than finding personal satisfaction regardless of the moral and spiritual cost to themselves and others Hudson calls for a return to the classical tradition no one should be called happy who cannot also be called morally good However a contemporary version of happiness should also go beyond the classical notion by making room in the happy life for suffering and passion Using the history of the idea of happiness as a backdrop to a critique of contemporary views Hudson examines happiness from philosophical religious psychological sociological literary and political points of view for example he shows how the tension between the two definitions of happiness is at the heart of the Declaration of Independence The result is an excellent overview of the history of an idea as well as a compelling argument for moral and political change in our time

Tessman, 2013-02-01 The Analyst's Analyst Within is the most illuminating study to date of how psychoanalysts experiences with their own analysts affect their lives their loves and their evolving professional identities A gifted interviewer with equally gifted interview subjects Tessman samples different gender combinations and age ranges in showing how the values typifying different eras of psychoanalytic theorizing enter into the meaning and impact of training analyses Tessman's findings are striking and they do not end with her discovery of startling differences according to the decade during which a training analysis took place She also found that neither the theoretical orientation of the training analyst nor his or her technical preferences predicted whether years later the analysis would be remembered as satisfying or dissatisfying as growth promoting or thwarting Rather it was the quality of affective engagement that became reliably present with the figure of the training analyst inscribed in all his or her particularity accounting for the perceived sense of a truly productive analytic experience Tessman's research program which encompasses her methodology her skill as an interviewer and the wisdom and clarity of thought of her participants lifts this work well beyond the perfunctory debates about psychoanalytic training that recur in the journal literature The power of The Analyst's Analyst Within resides in compelling individual narratives in which analysts revisit their own treatment past and the analyst within with candor vividness and often great poignancy The result is a book that not only supersedes previous studies of the training analysis but also opens a new vista on how and why analysis works when it works and fails when it fails *General Laws of the State of New York* New York (State), 1922 *The Law Journal Reports*, 1888 **The Consolidated Laws of the State of New York, 1909** New York (State), 1909 FOCAPD-19/Proceedings of the 9th International Conference on Foundations of Computer-Aided Process Design, July 14 - 18, 2019 Salvador Garcia Munoz, Carl D.
