Web Of Belief:

The Web of Belief Willard Van Orman Quine, J. S. Ullian, 1970 Reason in the Service of Faith Paul Helm, 2023-03-01

Paul Helm is a distinguished philosopher with particular interests in the philosophy of religion. His work covers some of the most important aspects of the field as it has developed in the last thirty years with particular contributions to metaphysics, religious epistemology, and philosophical theology. In celebration of Helm's life's work, *Reason in the Service of Faith* brings together a range of his essays which reflect these central concerns of his thought. Over thirty of Helm's selected essays and four unpublished articles are gathered into five parts: Metaphilosophical Issues, Action, Change, and Personal Identity, Epistemology, God and Creation, Providence, and Prayer. The volume is prefaced with a short editorial introduction and ends with an extensive bibliography of Helm's published works. Demonstrating the important connection between Helm's theological and philosophical interests across his body of work, this collection is a remarkable resource for scholars of religion, philosophy, and theology.

The Web of Belief. Quine Willard Van Orman Quine, J. S. Ullian, 1970 Faith with Reason Paul Helm, 2000

Paul Helm presents a new study of the nature of religious faith, investigating what makes it reasonable. Religious belief needs to meet and sustain philosophical scrutiny just as any other type of belief does. Nothing about religion purchases immunity from this. But at the same time, religious epistemology must also respect the contours of religion, the distinctiveness of the subject matter of religious belief. Helm looks sympathetically at two currently prominent ways of defending the rationality of religious belief: Reformed epistemology and the cumulative case for theism. He argues that the reasonableness of faith depends not only on beliefs about the world but also on beliefs about oneself, for instance, about what one wants, about one's hopes and fears, and on what one is willing to trust. Helm goes on to look at the relations between belief and trust, and between faith and virtue, and concludes with an exploration of one particular type of belief about oneself: the belief that one is oneself a believer. This is a book for anyone interested in the basis of religious faith.

Aztec Philosophy James Maffie, 2013-09-15

In *Aztec Philosophy*, James Maffie reveals a highly sophisticated and systematic Aztec philosophy worthy of consideration alongside European philosophies of their time. Bringing together the fields of comparative world philosophy and Mesoamerican studies, Maffie excavates the distinctly philosophical aspects of Aztec thought. *Aztec Philosophy* focuses on the ways Aztec metaphysics, the Aztecs' understanding of the nature, structure, and constitution of reality, underpinned Aztec thinking about wisdom, ethics, politics, and aesthetics, and served as a backdrop for Aztec religious practices as well as everyday activities such as weaving, farming, and warfare. Aztec metaphysicians conceived reality and cosmos as a grand, ongoing process of weaving. Theirs was a world in motion. Drawing upon linguistic, ethnohistorical, archaeological, historical, and contemporary ethnographic evidence, Maffie argues that Aztec metaphysics maintained a processive, transformational, and non-hierarchical view of reality, time, and existence, along with a pantheistic theology. *Aztec Philosophy* will be of great interest to Mesoamericanists, philosophers, religionists, folklorists, and Latin Americanists, as well as
