The Earp Decision:

Decisions and Orders of the National Labor Relations Board United States. National Labor Relations Board, 1987 *The American Reports, Containing All Decisions of General Interest Decided in the Courts of Last Resort of the Several States*, 1888 Counterpunch Meg Frisbee, 2016-05-02 Boxing was popular in the American West long before Las Vegas became its epicenter However not everyone in the region was a fan Counterpunch examines how the sport's meteoric rise in popularity in the West ran concurrently with a growing backlash among Progressive Era social reformers who saw boxing as barbaric These tensions created a morality war that pitted state officials against city leaders boxing promoters against social reformers and fans against religious groups Historian Meg Frisbee focuses on several legendary heavyweight prizefights of the period and the protests they inspired to explain why western geography economy and culture ultimately helped the sport's supporters defeat its detractors A fascinating look at early American boxing Counterpunch showcases fighters such as Gentleman Jim Corbett Bob Fitzsimmons and Jack Johnson the first African American heavyweight champ and it provides an entertaining way to understand both the growth of the American West and the history of this popular and controversial sport

Government Decision Making Ron R. Wallace, 1980 The present study assesses the degree to which recommendations made by Environmental Assessment Panels have influenced the federal decision making process This is done principally by analysis of five case studies Exec Summary *Passing the Buck* Kathryn Harrison, 2011-11-01 Within Canada the renewed importance of environmental issues in recent years has given rise to legislative and regulatory initiatives by both the federal and provincial governments which in turn has led to increased intergovernmental conflict Recent jurisdictional disputes over

the Quebec government's James Bay hydro development the Al Pac pulp mill and Oldman River dam in Alberta and the Rafferty Alameda dam in Saskatchewan to name but a few have led to increasingly important debate on the appropriate balance of federal and provincial roles in environmental policy Passing the Buck is the first in depth study of the impact of federalism on Canadian environmental policy The book takes a detailed look at the ongoing debate on the subject and traces the evolution of the role of the federal government in environmental policy and federal provincial relations concerning the environment from the late 1960s to the early 1990s The author challenges the widespread assumption that federal and provincial governments invariably compete to extend their jurisdiction Using well researched case studies and extensive research to support her argument the author points out that the combination of limited public attention to the environment and strong opposition from potentially regulated interests yields significant political costs and limited political benefits As a result for the most part the federal government has been content to leave environmental protection to the provinces In effect the federal system has allowed the federal government to pass the buck to the provinces and shirk the political challenge of environmental protection Of particular importance to those in environmental studies policy planning political science and law Passing the Buck makes an original contribution to the literature of Canadian federalism and environmental policy It is timely both in light of growing awareness of environmental challenges facing Canada and its examination of how we and other countries around the world adapt and rearrange our political systems to cope with large scale ecological change
