Inscriptions Daniel J. Geagan, 2011-09-09 This is the last of five volumes presenting inscriptions discovered in the Athenian Agora between 1931 and 1967. Published here are inscriptions on monuments commemorating events or victories on statues or other representations erected to honor individuals and deities and on votive offerings to divinities. Most are dated to between the 4th century B.C. and the 2nd century A.D. but a few survive from the Archaic and Late Roman periods. A final section contains monuments that are potentially but not certainly dedicatory in character and a small number of grave markers omitted from Agora XVII. Each of the 773 catalogue entries includes a description of the object inscribed, bibliography, a transcription of the Greek text and commentary. There are photographs of each piece of which no adequate illustration has yet been published, including newly joined fragments. The volume concludes with concordances and six indexes.

Evidence-Based Practice for Nurses: Appraisal and Application of Research Nola A. Schmidt, Janet M. Brown, 2021-09-02 Evidence Based Practice for Nurses Appraisal and Application of Research Fifth Edition is an essential resource for teaching students how to translate research into practice.

New Approaches to Specialized English Lexicology and Lexicography Marián Alesón, Isabel Balteiro, 2010-10-12 This book gathers some of the latest approaches to Lexicology and Lexicography which span from research on language for specific purposes to the study of lexical constellations and translation. It aims to present a multifaceted insight on current trends and thus includes papers that explore lexical processes in several areas which comprise fields so diverse and riveting such as the language of cinema, fashion, tourism and even comics. In addition, other papers examine the lexicon of well established professional languages such as the language of law, medicine and business by revealing leading edge perspectives on topics such as translation, word formation, cultural clashes or lexical selection. Key issues on learning and teaching are also considered as part of a long tradition in the study of professional and academic languages that posits users' learning needs as the cornerstone to the study of these languages. Therefore, this work proposes a strong emphasis on lexis and terminology which are highlighted as the fundamental core of the definition and analysis of specialized languages. All in all, this publication intends on the one hand to embrace current trends in the study of specialized lexicon and terminology from the perspective of both Lexicology and Lexicography and on the other hand to open new possibilities for future research.
