Trokhimenko,2014 The study examines textual representations of women s laughter and smiling and their imagined  
connection to female virtue in a wide variety of discourses and contexts of the German Middle Ages including medieval epic  
ecclesiastical texts conduct literature lyric and sculpture By engaging with the competing and at times contradictory views of  
female laughter it reaffirms a disputatious nature of medieval culture in which multiple views of femininity sexuality and  
virtue stood in a conflicting yet productive dialogue with one another The society that emerges when one looks at medieval  
German texts is always ambivalent it thrives on and enjoys talking about sensuality and eroticism while being constrained by  
the conventions of polite behavior and the fear of sin it relies on the ritual use of laughter while marking it as a sign of lust  
and perdition Women s laughter thus offers an important way into understanding medieval views of gender because it  
combines physicality with shifting and conflicting cultural norms      **Anthology of Magazine Verse** William Stanley
