Schäfer,2019-11-07 Starting from the sociology of Pierre Bourdieu Sch fer composes a methodical approach to habitus of  
social actors and the logic of their praxis Building upon the generative terms of praxeology he focuses on identity and  
strategy in processes of internalization their transformation by means of dispositional schemes and their externalization in  
action The emphasis lies on a theory of dispositions that allows a flexible understanding of identity and strategy formation in  
the context of social experience and the interplay with social structures This theory is developed over the course of a three  
step analysis on habitus as a network of dispositions on the dynamics that unfold between the logic of socio structural  
processes and practical logic and on the praxeological assessment of social structures via models of fields and the social  
space This book is the second of three volumes of HabitusAnalysis While the first volume deals with the epistemological  
underpinnings of praxeology this book advances Bourdieu s theory with a special focus on creativity of action in the context  
of social structures thereby preparing the methodological design of empirical models in the third volume    [Stepping Back](#)
