## Why Men Work:

*Why Men Win at Work* Gill Whitty-Collins, 2020-08-01 Why are men still winning at work If women have equal leadership ability why are they so under represented at the top in business and society Why are we still living in a man s world And why do we accept it In this provocative book Gill Whitty Collins looks beyond the facts and figures on gender bias and uncovers the invisible discrimination that continues to sabotage us in the workplace and limits our shared success Addressing both men and women and pulling no punches she sets out the psychology of gender diversity from the perspective of real personal experience and shares her powerful insights on how to tackle the gender equality issue This book tells the inconvenient truth about the gender inequality issue providing some real deep insights into what truly gets in the way of driving diversity even in companies that are trying to do the right thing It may be uncomfortable reading for some but crucial for driving the needed change to create a long term advantage Paul Polman Founder Chair Imagine and Ex CEO Unilever

**Part-Time Work and Employee Satisfaction** Paula Müller, 2018-11-28 Essay from the year 2014 in the subject Leadership and Human Resources Miscellaneous grade 1 0 University of Applied Sciences Dresden language English abstract Is part time work the key to happier families Empirical findings on job satisfaction and personal happiness of part time workers Over the last decades there has been a large increase of women in jobs and hence an increase in dual earner households Consequently a significantly higher amount of stress and pressure on men and women has been observed as it is difficult to combine the duties at work and at home which can reduce the overall quality of life and threat the work life balance For many people part time work can be a solution to this problem especially in industrial nations By definition an employee works part time if he regularly works fewer hours than a comparable full time employee The number of hours varies from state to state and institution to institution However there has been an increase in part time work also in traditionally full time professions In Europe about 32% of all women and 8% of men work part time though this rate is lowest in eastern countries and highest in northern and western countries In the USA about 23% of employees work part time But does part time employment really increase the personal and work satisfaction Why is the satisfaction higher or lower and what are benefits and disadvantages of part time work Moreover what determines the satisfaction in part time arrangements apart from influences of work and personal life
