Spectral Methods in Food Analysis Mossoba,1998-11-11 Outlines the basic principles advanced instrumentation applications and future potential of a range of spectral techniques in food analysis The book introduces new applications of GC MS LC MS MALDI TOF MS GC FTIR SFC FTIR ATR and Raman spectroscopy The book covers the identification and quantitation of food constituents additives and contaminants Spectroscopic Methods in Food Analysis Adriana S. Franca,Leo M.L. Nollet,2017-12-14 Given the inherent complexity of food products most instrumental techniques employed for quality and authenticity evaluation e.g chromatographic methods are time demanding expensive and involve a considerable amount of manual labor Therefore there has been an increasing interest in simpler faster and reliable analytical methods for assessing food quality attributes Spectroscopic Methods in Food Analysis presents the basic concepts of spectroscopic methods together with a discussion on the most important applications in food analysis The determination of product quality and authenticity and the detection of adulteration are major issues in the food industry causing concern among consumers and special attention among food manufacturers As such this book explains why spectroscopic methods have been extensively employed to the analysis of food products as they often require minimal or no sample preparation provide rapid and on line analysis and have the potential to run multiple tests on a single sample i.e non destructive This book consists of concepts related to food quality and authenticity that are quite broad given the different demands of the manufacturer the consumer the surveillance and the legislative bodies that ultimately provide healthy and safe products

Handbook of Food Analysis - Two Volume Set Leo M.L.
