Abstract This 10th edition book has the essential features of the original book as written by Professor Monroe. Monroe originated the Monroe's Motivated Sequence which forms the conceptual core of so many successful persuasive and actuating speeches. Monroe also introduced a three-step process to teaching speech. Topics covered in the book include public speaking skills, the basic elements of speechmaking, listening, speaker-audience interaction, planning and preparing speeches, choosing speech subjects and purposes, analyzing the audience and occasion, using motivational appeals in speech preparation, finding and using supporting materials, adapting the speech structure to audiences, beginning and ending the speech, outlining the speech, using visuals, developing speeches to persuade, inform, and entertain. This book includes several sample speeches for study and analysis, as well as recommended supplementary reading.

Convinced that public speaking fears outranked all other fears, the authors combined their years of teaching novice speakers to set forth their techniques for reducing apprehension and sharpening communication performance skills. The three basic techniques stressed are cognitive structuring or attitude change, relaxation techniques, and skills training. All of the topics addressed herein are intended for students in basic speech communication classes. Some of the topics are the process of communication, assessing yourself as a communicator, improving attitudes, and reducing apprehension, preparing and delivering a public speech, improving skills in group discussions, as well as in all types of social relationships. This handbook presents the first systematic account of corpus phonology, the employment of corpora for studying speakers and listeners' acquisition and knowledge of the sound system of their native languages, and the principles underlying those systems. The first part of the book discusses the design, compilation, and use of phonological corpora, while the second looks at specific applications. Part 3 presents the tools and methods used, while the final part examines a number of currently available phonological corpora in various languages. It will appeal not only to those working with phonological corpora but also to researchers and students of phonology and phonetics more generally, as well.
