Clairvoyance and Occult Powers - William Walker Atkinson Swami Panchadasi,2019-09-14 All occultists know that man has other senses than the ordinary five although but few men have developed them sufficiently well to use them effectively These super physical senses are known to the occultists as the astral senses The term Astral used so frequently by all occultists ancient and modern is derived from the Greek word astra meaning star It is used to indicate those planes of being immediately above the physical plane The astral senses are really the counterparts of the physical senses of man and are connected with the astral body of the person just as the physical senses are connected with the physical body The office of these astral senses is to enable the person to receive impressions on the astral plane just as his physical senses enable him to receive impressions on the physical plane On the physical plane the mind of man receives only the sense impressions of the physical organs of sense but when the mind functions and vibrates on the astral plane it requires astral senses in order to receive the impressions of that plane and these as we shall see are present Each one of the physical senses of man has its astral counterpart Thus man has in latency the power of seeing feeling tasting smelling and hearing on the astral plane by means of his five astral senses More than this the best occultists know that man really has seven physical senses instead of but five though these two additional senses are not unfolded in the case of the average person though occultists who have reached a certain stage are able to use them effectively Even these two extra physical senses have their counterparts on the astral plane Taken from *Clairvoyance and Occult Powers* written by William Walker Atkinson under the Pseudonym Swami Panchadasi **The Complete Works of William Walker Atkinson: The Power of Concentration, Mind Power, Raja Yoga, The Secret of Success, Self-Healing by Thought Force and much more** William Walker Atkinson,2017-06-28 This carefully edited collection has been designed and formatted to the highest digital standards and adjusted for readability on all devices The Art of Logical Thinking The Crucible of Modern Thought Dynamic Thought How to Read Human Nature The Inner Consciousness The Law of the New Thought The Mastery of Being Memory Culture Memory How to Develop Train and
