Local Climate Action Planning Michael R. Boswell,Adrienne I. Greve,Tammy L. Seale,2012-07-16 Climate change is a global problem but the problem begins locally Cities consume 75% of the world s energy and emit 80% of the world s greenhouse gases Changing the way we build and operate our cities can have major effects on greenhouse gas emissions Fortunately communities across the U S are responding to the climate change problem by making plans that assess their contribution to greenhouse gas emissions and specify actions they will take to reduce these emissions This is the first book designed to help planners municipal staff and officials citizens and others working at local levels to develop Climate Action Plans CAPs are strategic plans that establish policies and programs for mitigating a community s greenhouse gas GHGs emissions They typically focus on transportation energy use and solid waste and often differentiate between community wide actions and municipal agency actions CAPs are usually based on GHG emissions inventories which indentify the sources of emissions from the community and quantify the amounts Additionally many CAPs include a section addressing adaptation how the community will respond to the impacts of climate change on the community such as increased flooding extended drought or sea level rise With examples drawn from actual plans Local Climate Action Planning guides preparers of CAPs through the entire plan development process identifying the key considerations and choices that must be made in order to assure that a plan is both workable and effective
