Minding the Earth, Mending the World Susan Murphy,2012-08-01 We all know our earth is in trouble But is it beyond repair Are we stuck with a planetary disaster we cannot hope to address Despite the reality we find ourselves in Zen practitioner and author Susan Murphy reminds us of the astounding intelligence and magnificence of nature and argues that not only is it not too late but that we all have the capacity to embrace this challenge with a sense of hope and reason By shining a sober light on the current state of emergency Murphy delivers a brilliant rethink of the crisis we face radically reimagining the stories we tell ourselves about the world and illuminating the ways humanity might become the solution rather than the problem What if we were to choose courage and resolve rather than fear What if we discovered the difference each of us could make and started to listen closely to what the earth is saying and to our own connections with it In the tradition of the great eco theologian Thomas Berry *Minding the Earth Mending the World* offers a profoundly hopeful second chance to engage with what it means to deeply mind the earth once more

Reliability: Discovering a Science-Based Genesis James Gregory, 2012-04-04 The most widely published book in the world is the Bible It is also the most criticized book in print With the development of modern communication technology critics can attack the Bible on a global scale bypass reviews and quality control processes and make unchallenged claims The information appears to be truthful and is presented with authority but ignores the real truth The objective of this book is to compare Bible statements primarily from Genesis with modern scientific knowledge The result is an excellent match between the Bible written thousands of years ahead of the scientific discoveries and science

Two Wings Douglas Kries, Brian Clayton, 2018-03-22 In this book two college professors explain how believing and reasoning are two human activities that may be integrated to form a complete view of human existence They take their title from the opening of John Paul II's encyclical *Fides et Ratio* which speaks of the human spirit rising on the two wings of faith and reason to stretch toward the truth that is available to all In the first part of the book the authors offer a basic yet engaging encounter with traditional arguments for and against God's existence They grapple with doubts arising from the question of evil and the discoveries of contemporary natural science The final chapters take up questions from ethics and politics that impact the way individuals and communities choose to structure their lives This book is non dogmatic it seeks to probe the contours of the questions asked by inquiring minds The authors fairly address arguments supporting and opposing their own viewpoints while using simple analogies designed for non specialists Thus they provide the best available starting point for confidently entering into the greatest conversation of all time
