some motive force and more than that a force with some intentionality To target is to aim to project and ultimately to impact It suggests a space of violence or at least action or movement resulting in displacement which most other terms do not In that sense it is useful underused and perhaps revelatory Rather than approach the city as simply a site of growth processes and developments the contributors to this volume treat it as the recipient of attentions The work draws on a wide variety of geographical sites and historic monuments in order to explore this concept examining and challenging current urban theories It seeks to highlight both the power of The Global City and the current vulnerability and fragility of urban culture exploring the city as a recipient and a culprit in relation to issues including terrorism and urban warfare the latest cyclical failure of global financial markets and the relatively new spectre of environmental unsustainability Offering a unique and relevant contribution to the literature this work will be of great interest to scholars of urban theory international relations
