Winnicott Studies No 9:

The Mother in Psychoanalysis and Beyond Rosalind Mayo, Christina Moutsou, 2016-10-04 The question of what it means to be a mother is a very contentious topic in psychoanalysis and in wider society *The Mother in Psychoanalysis and Beyond* explores our relationship to the maternal through psychoanalysis philosophy art and political and gender studies Over two years a group of psychotherapists and members of the public met at the Philadelphia Association for a series of seminars on the Maternal In the discussions that followed a chasm opened up slowly and painfully between the idealised longings and fantasies we all share and the realities of maternal experiences here were met the great silences of love loss longing memories desire hatred and ambivalence This book is the result of this bringing together in conversation and reflections of what so often seems unsayable about the Mother It examines how issues of personal and gender identity are shaped by the ideals of separation from the mother the fears and anxiety of merging with the mother and how this has often led in psychoanalysis and society to holding mothers responsible for a variety of personal and social ills and problems in which maternal vulnerability is denied and silenced There are two main themes running throughout the book *Matricide and Maternal Subjectivity* On the theme of matricide several contributors discuss the ways in which the discourse and narratives of the Mother have been silenced on a sociocultural level and within psychoanalysis and philosophy in favour of discourses that promote independence autonomy power and the avoidance and denial of our fundamental helplessness and vulnerability On the theme of maternal subjectivity several chapters look at the actual experience of mothering and or our relationship to our mother to highlight the ways in which the maternal is intimately connected with human subjectivity *The Mother in Psychoanalysis and Beyond* provides new and provocative thinking about the maternal and its place in various contemporary discourses It will appeal to psychoanalysts psychotherapists and psychologists of different schools scholars and advanced students of art gender studies politics and philosophy as well as anyone interested in maternity studies and the relationship between the maternal and human subjectivity

The Undead Mother Christina Wieland, 2018-03-29 A state of mourning is something that the late twentieth century has been uniquely unable to achieve A culture based on the interchangeability of products and people a throw away culture is not conducive to mourning Inanimate objects have replaced human ideals A culture of virtual reality which finds it difficult to distinguish between the living and the inanimate has been created a culture of the undead This culture is not grounded on human relationships but in the destruction of them In this book Christina Wieland offers the reader a far reaching and devastating critique of masculinity femininity and contemporary culture Drawing inspiration from the work of Melanie Klein the author demonstrates how the Western psyche is based upon denial of the power of the mother and the elevation of the father into a repressive authoritarian figure This act of universal matricide has wrought havoc throughout Western culture As Wieland graphically illustrates both women and men are denied the opportunity to mourn their separation from the mother but must contend instead with the guilt that surrounds her murder

and the ever present terror of her vengeful return as the undead mother Re appraising masculinity and femininity the author re visits a wide and fascinating range of myths fairytales and stories Her critique casts new light on the writings of Freud Klein Kristeva and Irigaray Her vivid presentations of clinical material also show how the undead mother makes her presence felt in the consulting room and the steps which can be taken towards more genuine reparative mourning **Regretting**

Motherhood Orna Donath,2017-07-11 A provocative and deeply important study of women's lives women's choices and an unspoken taboo that questions the societal pressures forcing women into motherhood Women who opt not to be mothers are frequently warned that they will regret their decision later in life yet we rarely talk about the possibility that the opposite might also be true that women who have children might regret it Drawing on years of research interviewing women from a variety of socioeconomic educational and professional backgrounds sociologist Orna Donath treats regret as a feminist issue as regret marks the road not taken we need to consider whether alternative paths for women currently are blocked off She asks that we pay attention to what is forbidden by rules governing motherhood time and emotion including the cultural assumption that motherhood is a natural role for women for the sake of all women not just those who regret becoming mothers If we are disturbed by the idea that a woman might regret becoming a mother Donath says our response should not be to silence and shame these women rather we need to ask honest and difficult questions about how society pushes women into motherhood and why those who reconsider it are still seen as a danger to the status quo Groundbreaking thoughtful and provocative this is an especially needed book in our current political climate as women's reproductive rights continue to be at the forefront of national debates **Winnicott's Babies and Winnicott's Patients** Margaret Boyle Spelman,2018-05-11

Winnicott's thinking continues to grow in importance in psychoanalysis today This book can be described as a clinical primer by presenting her own personal responses to Winnicott and her initial understanding of his thinking the author tries to help others develop their own Winnicott to assist with their clinical thinking This book makes explicit the parallel in Winnicott's thinking between the situation of the baby and the nursing couple and the patient and the analytic couple There are two helpful baby observation pieces which are aimed at first giving something of the experience of completing a baby observation and then of the reporting of it In addition to these there are chapters that treat Winnicott's thinking and the comparison of the original baby with the one who appears in the course of an adult therapy Winnicott's thinking is first situated historically Then each of his three stages of dependence are explored in detail absolute dependence relative dependence and going towards independence These are looked at from the viewpoint of the patient baby and the mother therapist in both developmental and clinical situations **Men's Silences** Jonathan Rutherford,2023-03-31 First published in 1992 Men's Silences represents a personal and a political attempt to break out of the narrow parameters of men's sexual politics It focusses on men's feelings to language The early chapters provide a social context for exploring the practice and theorizing of men's sexual politics The book continues by developing an alternative theoretical framework for addressing male

subjectivity using Wittgenstein's theory of language and the psychoanalytic theories of Winnicott, Bion, and Klein. The author argues for the centrality of the pre-oedipal mother-son relationship in the making of male subjectivity, language, and identity. This book will be of interest to students of sociology, gender studies, political science, and cultural studies.
