## **Winning Is Everything Losing Is Nothing:**

**Winning is Everything, Losing is Nothing** Elvin Feltner, 1980      **Western Philosophy** John G.

Cottingham, 2021-07-02 The new edition of this celebrated anthology surveys the Western philosophical tradition from its origins in ancient Greece to the work of today's leading philosophers. *Western Philosophy: An Anthology* provides an authoritative guided tour through the great tradition of Western philosophical thought. The seminal writings of the great philosophers along with more recent readings of contemporary interest are explored in 144 substantial and carefully chosen extracts, each preceded by a lucid introduction guiding readers through the history of a diverse range of key arguments and explaining how important theories fit into the unfolding story of Western philosophical inquiry. Broad in scope, the anthology covers all the main branches of philosophy: theory of knowledge and metaphysics, logic and language, philosophy of mind, the self and freedom, religion and science, moral philosophy, political theory, aesthetics, and the meaning of life. All in self-contained parts which can be worked on by students and instructors independently. The third edition of the *Anthology* contains newly incorporated classic texts from thinkers such as Aquinas, Machiavelli, Descartes, William James, and Wittgenstein. Each of the 144 individual extracts is now followed by sample questions focusing on the key philosophical problems raised by the excerpt and accompanied by detailed further reading suggestions that include up-to-date links to online resources. Also new to this edition is an introductory essay written by John Cottingham which offers advice to students on how to read and write about a philosophical text. Part of the Blackwell Philosophy Anthologies series, *Western Philosophy: An Anthology, Third Edition* remains an indispensable collection of classic source materials and expert insights for both beginning and advanced university students in a wide range of philosophy courses.

**Language, Mind, and Art** D. Jamieson, 2013-03-09 This book is a collection of essays in honor of Paul Ziff written by his colleagues, students, and friends. Many of the authors address topics that Ziff has discussed in his writings: understanding rules and regularities, proper names, the feelings of machines, expression, and aesthetic experience. Paul Ziff began his professional career as an artist, went on to study painting with J. M. Hanson at Cornell, and then studied for the Ph.D. in philosophy also at Cornell with Max Black. Over the next three decades he produced a series of remarkable papers in philosophy of art, culminating in 1984 with the publication of *Antiaesthetics: An Appreciation of the Cow with the Subtle Nose*. In 1960 he published *Semantic Analysis*, his masterwork in philosophy of language. Throughout his career he made important contributions to philosophy of mind in such papers as *The Simplicity of Other Minds* (1965) and *About Behaviourism* (1958). In addition to his work in these areas, his lectures at Harvard on philosophy of religion are an underground classic, and throughout his career he has continued to make art and to search for the meaning of life in the properties of prime numbers. Although his interests are wide and deep, questions about language, art, and mind have dominated his philosophical work, and it is problems in these areas that provide the topics of most of the essays in this volume.
