Ian Graham worked as Liverpool FC's Director of Research. His tenure coincided with the club's greatest period of success since the 1980s including winning the Premier League in 2020 Liverpool's first league title after an agonising three decades. Here for the first time Graham reveals the fascinating data that informed some of the club's most pivotal moments of the past decade from the appointment of Jurgen Klopp as manager in 2015 to the signing of Mohamed Salah in 2017. Along the way he shares groundbreaking insight into the modern game including how a season largely played behind closed doors transformed our understanding of home team advantage or why the GOAT greatest of all time might not be who you think. And in a game that is increasingly dominated by an elite few Graham charts a path for the future where a data savvy competitor will always find the edge.

A fascinating witty and remarkably insightful account of Liverpool's reinvention and a clear-eyed detailed explanation of the inner workings of modern football. Nobody is better qualified to tell either of those stories than Ian Graham who stands as one of the most quietly significant figures in the recent history of the club and the sport. Rory Smith author of *Expected Goals* and Chief Soccer Correspondent New York Times. Never before has the data revolution in football been described so well from the inside. Christoph Biermann author of *Football Hackers: How to Win the Premier League* gives you three books for the price of one: a book about all of the silly inefficiencies plaguing European football, a book about what it's like to be empowered to use outside the box thinking to help turn your boyhood club into the best team in the world, and a book about how football actually works. If he really wanted to Ian could easily put me out of a job. Ryan O'Hanlon author of *Net Gains* and staff writer ESPN. A Sunday Times bestseller August 2024.

A Wall Street Journal and Washington Post bestseller. A playbook for creating your company's winning strategy. Now also includes two HBR articles by the authors. Strategy is not complex. But it is hard. It's hard because it forces people and organizations to make specific choices about their future, something that doesn't happen in most companies. In this contemporary business classic now with a foreword from former Harvard Business Review editor in chief Adi Ignatius and new articles providing fresh insights, two of today's most respected business thinkers explain what strategy is for, how to think about it, and how to get it done. And they use one of the most successful corporate turnarounds of the past century which they achieved together to prove their point. The result is a playbook for winning. At its core is a set of five integrated and essential strategic choices: What is our winning aspiration? Where will we play? How will we win? What capabilities must we have in place to win? What management systems are required to support our choices? The authors tell rich stories of iconic P&G brands such as Olay, Bounty, Gillette, and more to clearly illustrate how deciding on a strategic

approach and then making the right choices to support it makes the difference between just playing the game and actually winning
