people we are told just have it as though this was a genetic trait gifted through the DNA like a well manicured abstract painting bestowed on fortunate few who were born with their parents good genes and teeth or were lucky enough to grow up in households where there was a stage and someone made them appear on it It belongs to extroverts right It belongs to leaders who never waiver to confident articulate speakers to bold risk taker Some of us convince ourselves if hands raised and voices steady confidence is not how we came out of the womb never mind for us And so we wait We wait for life to slow down for the ideal moment to magically fall into alignment or for someone to finally tell us that we are okay and that we can feel proud of ourselves But what if that entire paradigm was incorrect What if instead of something you have confidence was something you do What if it isn't actually something you are born with but instead something you practice doing small repeatable choices that inform the way you communicate the way you act and the way you bounce back even when the world feels uncertain or your voice trembles What if the most powerful version of you existed not in the depths of your uncertainties but on the other side of a habit loop you could create one tiny adjustment at a time And that is the whole pulse or rhythm of this book confidence is not a personality but a practice You don't have to be fake All you have to do is stop playing the tape of self doubt and start playing the tape of self trust building actions Not performativity Not perfectly But consistently And I'm going to tell you the changes you will witness not only in the external but internally in your body conversations boundaries recovery time and presence So first up is breaking down the illusion a lot of us were sold The Sale of the Confidence Myth Like other things people thought were important popularity success charisma one learned about confidence by observing who got picked the most who shouted the loudest and who despite being picked last every time sauntered through the hallways unaffected It was perceived to us as a wearing surface not a striving process We associated it with certainty rather than curiosity To us it meant the presence of answers rather than the presence of good questions This led us to make internal rules we never asked a single question about We reasoned I fall I cannot be sure of myself If I stumble on my words turn bright red go mute and lose my place I do not have it If I take time to think before I speak I am weak And so these beliefs settled in and became the lens through which we measured every moment of connection But the fact is confidence is not a boisterous perfect or always calm woman It's not a vibe not an aesthetic not an Instagram ready thing Or confidence is a micro habit practiced when no bodies are clapping It lives in the small choices saying no when you are scared of letting people down doing it before you know if it will work and having your voice shake when you speak up for example This is the actual work that matters They don't come with applause But they develop a kind of self confidence that sticks What Atomic Really Means Hint It's Not about Perfection This book has the word atomic in it and very conscious of it not only just because it sounds catchy but really the essence of how real change takes place Atomic doesn't mean explosive It means small Foundational Unbreakable The root of everything larger Habits atomic ones to be precise maybe the minuscule building blocks of everything that we become not because they are ostentatious but simply because they are reiterated

Relentlessly Quietly It works exactly the same way in Atomic confidence Not some switch you just flip or wake up one day confident If you re showing up in dozens of little ways every day ways that people don t see because they don t look like confidence at all Like the decision to breathe rather than panic Using the phrase more I get back to you less overcommitting Documenting your wins in order to have your brain not wipe them out overnight These small quiet shifts stack This is what they turn you into a version of yourself that needn t prove anything your life is proof This is not a book to change you into someone else It is about being more who you already are with consistency with focus and without having to act You will not have a eureka moment You need a baseline And that is what being atomic gives you A foundation A pattern A rhythm that lasts Self Belief vs Self Esteem vs Self Respect Before diving in you ll need to learn three terms that are so frequently intertwined it makes them difficult to distinguish from one another self trust self regard and self respect you need to understand these words to get the best out of this book They know each other but are not identical twins Your self belief is your personal capacity to be convinced that you CAN do it even if it is difficult It s action oriented TRY NOT TO SUCCEED TRY TO TRY it GROWS Surviving difficult things feeds your self trust the more you show up for hard things the more you have confidence in yourself to do hard things It sets itself up automatically as needing no evidence in advance because it becomes the evidence Self esteem is your overall opinion of your worth and value It s your emotional baseline Then it may shift based on your sleep your sense of support or your alignment with your values Self esteem can fluctuate like the weather That s okay This book stabilizes it for you with rituals that bring you back to truth Self respect is the fence that keeps both of the above inside the gate This is not an emotion it is a choice You decide to bolster your own well being despite your faltering faith in yourself or your confidence It is the muscle that prevents you from shrinking chasing approval and abandoning your needs It is also the part of you that says I may not feel strong right now but I will not deceive myself in order to belong And therein lies its power You could learn all three and easily do that but don t have to get all three to be a great place to start The idea is that these two will grow each other One rep at a time The Compound Effect of Micro Wins Like if you ever feel like you are not moving up fast enough then probably you are ignoring your micro wins These are the moments of growth we never see the moments that go uncelebrated never involving a promotion a heart or a spiffy cup But they are everything The micro win is raising your voice in a group even if your voice quakes That is when you feel triggered you pause before reacting And givin a fuck when your brain tells you you are not enough It is unplugging your computer at a reasonable hour leaving a friendship that no longer feels reciprocal or just observing a negative thought and deciding to dismiss it These tiny shifts aren t motivational fluff They are neurological rewires Every time you act in alignment with your future self you re training your brain to believe new things about who you are The reward isn t just the outcome it s the identity And when stacked over days and weeks these wins compound into something far more powerful than hype They become self trust Which is why this book is not organized around sensationalistic style transformations It s built around practice Because it s the only real

change we can count on the change you live with every day How to Use This Book Real Life Low Pressure All Gains This book does not need to be read in one go you do not have to underline every page follow every prompt or learn every technique All you need is the willingness to do so Open to showing up authentically To read at your own pace To take a step back and return when things turn chaotic To look at this not as a checklist but rather a dialog with your future self The book is divided into sections chronicling exactly the moments in which confidence is tested when you speak up move through failure put your foot down you enter new rooms and you doubted yourself It brings new thought in every chapter but ends with a bite sized action A thing that you can do today not someday And if you take only one thing away from this whole book let it be this confidence is never something that you wait for You practice it here while you have what you have where you are There is no ideal time to start There is only this one And you re ready Let s build it atom by atom Speak with Confidence Albert J. Vasile, Harold K. Mintz, 1999-08 Serious degradation mechanisms can severely reduce the service life of concrete structures steel reinforcement can corrode cement matrix can be attacked and even aggregates can show detrimental processes Therefore it is important to understand how damage can occur to concrete structures and to appreciate the timing of the actions leading to damage Damage to Concrete Structures summarizes the state of the art information on the degradation of concrete structures and gives a clear and comprehensive overview of what can go wrong Offering a logical flow the chapters are ordered according to the chronological timing of the actions leading to concrete damage The author explains the different actions or mechanisms in a fundamental manner without too many physical or chemical details to provide greater clarity and readability The book describes the different causes of damage to concrete including inappropriate design errors during execution mechanisms occurring during hardening of concrete and actions or degradation mechanisms during service life hardened concrete The degradation mechanisms are illustrated with numerous real world examples and many drawings and photographs taken of actual structures Written as a textbook for students as well as a reference for professionals this easy to comprehend book gives readers a deeper understanding of the damage that can occur to concrete during the construction process and service **Conquering Fear** Oscar Orlov, 2023-11-10 Fear an innate human emotion can often hinder our ability to communicate effectively In the realm of public speaking fear can be particularly crippling preventing individuals from expressing themselves with confidence and clarity Understanding the link between fear and communication is essential for anyone looking to overcome their anxieties and become a powerful speaker When we experience fear our bodies enter a state of fight or flight triggered by the release of stress hormones such as adrenaline This physiological response can have a profound impact on our ability to communicate In moments of fear our heart rate increases our breathing becomes shallow and our muscles tense up These physical manifestations can make it challenging to speak coherently leading to stammering stuttering or even complete silence Fear also affects our mental state causing us to lose focus and become overwhelmed with self doubt Negative thoughts and beliefs about our abilities can creep in further

exacerbating our communication difficulties We may worry about being judged or ridiculed leading to a fear of public humiliation These fears can create a vicious cycle as our anxiety increases with each negative experience making future speeches even more daunting To conquer fear and improve our communication skills it is crucial to develop strategies that address both the physical and mental aspects of fear Deep breathing exercises for instance can help regulate our heart rate and induce a sense of calmness By consciously taking slow deep breaths we can counteract the physical symptoms of fear and regain control over our bodies Another effective technique is positive visualization By visualizing successful speeches and positive outcomes we can reprogram our minds to focus on success rather than failure Affirmations and self talk can also be powerful tools in combating fear Replacing negative thoughts with positive ones can help boost our confidence and shift our mindset towards a more optimistic outlook Additionally seeking support from others can be invaluable in overcoming fear Joining public speaking groups or seeking the guidance of a speaking coach can provide a safe and supportive environment for practicing and refining our communication skills Surrounding ourselves with individuals who understand our fears and can provide constructive feedback can greatly improve our confidence and ability to speak with conviction
