## **Spectrum Of A Module Category:**

*The Spectrum of a Module Category* Henning Krause, 2001 These notes present an introduction into the spectrum of the category of modules over a ring We discuss the general theory of pure injective modules and concentrate on the isomorphism classes of indecomposable pure injective modules which form the underlying set of this spectrum The interplay between the spectrum and the category of finitely presented modules provides new insight into the geometrical and homological properties of the category of finitely presented modules Various applications from representation theory of finite dimensional algebras are included

Structured Ring Spectra Andrew Baker, Birgit Richter, 2004-11-18 This book contains some important new contributions to the theory of structured ring spectra

**Spectra and the Steenrod Algebra** H.R. Margolis, 2011-08-18 I have intended this book to be more than just the sum of its chapters and the introduction is in part an attempt to spell out what the more is Algebraic topology is the study of topological problems by algebraic means More precisely this has come to be framed as the study of topological categories by means of functors to algebraic categories Beyond the basic definitions and structure the focus is often on particular problems for example Adams use of K theory to solve the vector fields on spheres problem On the other hand there are contributions of a more global nature yielding insight into the overall structure of some topological category for example Quillen's work on rational homotopy type This book is intended primarily as a contribution of this latter sort So while there will be a variety of particular examples and computations and although the structure being developed has significant application to many specific problems some of which are considered here the major thrust of the text is toward understanding the global structure and linkage of the topological and algebraic categories considered the stable homotopy category and the category of modules over the Steenrod algebra

**The Category of  $H$ -Modules over a Spectrum** Jack Palmer Sanders, 1974 The category of  $H$  modules over a ring spectrum is introduced We prove that mapping cones can be constructed in the category and that these mapping cones are unique up to equivalence Other  $H$  modules are constructed by induction and a limit process We prove that each of the classical Thom spectra  $MO$   $MSO$   $MU$   $MSU$  and  $M\mathbb{S}p$  is a convergent  $H$  module over itself Finally we construct a tower of homology theories and natural transformations from  $MU$

Purity, Spectra and Localisation Mike Prest, 2009-06-04 It is possible to associate a topological space to the category of modules over any ring This space the Ziegler spectrum is based on the indecomposable pure injective modules Although the Ziegler spectrum arose within the model theory of modules and plays a central role in that subject this book concentrates specifically on its algebraic aspects and uses The central aim is to understand modules and the categories they form through associated structures and dimensions which reflect the complexity of these and similar categories The structures and dimensions considered arise particularly through the application of model theoretic and functor category ideas and methods Purity and associated notions are central localisation is an ever present theme and various types of spectrum play organising roles This book presents a unified coherent account of material which is

often presented from very different viewpoints and clarifies the relationships between these various approaches Category Theory, Homology Theory and Their Applications ,1969 **Bulletin of the American Mathematical Society** ,2001

*Rings, Modules, and Algebras in Stable Homotopy Theory* Anthony D. Elmendorf,1997 This book introduces a new point set level approach to stable homotopy theory that has already had many applications and promises to have a lasting impact on the subject Given the sphere spectrum  $S$  the authors construct an associative commutative and unital smash product in a complete and cocomplete category of  $S$  modules whose derived category is equivalent to the classical stable homotopy category This construction allows for a simple and algebraically manageable definition of  $S$  algebras and commutative  $S$  algebras in terms of associative or associative and commutative products  $R \wedge SR \rightarrow R$  These notions are essentially equivalent to the earlier notions of  $A$  infinity and  $E$  infinity ring spectra and the older notions feed naturally into the new framework to provide plentiful examples There is an equally simple definition of  $R$  modules in terms of maps  $R \wedge SM \rightarrow M$  When  $R$  is commutative the category of  $R$  modules also has a *Geometry & Topology* ,2008

American journal of mathematics ,2007 **Bulletin (new Series) of the American Mathematical Society** ,2001

**Mathematics of the USSR.** ,1975 Siberian Mathematical Journal ,1974 **Mathematical Reviews** ,2008

**Dissertation Abstracts International** ,2003 St. Petersburg Mathematical Journal ,2002 Current Developments in Mathematics ,2001 **Abelian Categories with Applications to Rings and Modules** Nicolae Popescu,1973

**Lectures on Rings and Modules** Karl Heinrich Hofmann,1972 From September 1970 through May 1971 Tulane University organized a special year long program in the theory of noncommutative rings and operator algebras Visitors from various institutions of the U S A and abroad contributed to a series of lectures in which they covered recent advances in their own field of specialty These notes contain these lectures to the extent that they have not appeared elsewhere This volume represents the purely algebraic side of the program with lectures in the structure theory of ring and modules *Hiroshima Mathematical Journal* ,1992

The Top Books of the Year Spectrum Of A Module Category The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the engaging narratives that have enthralled audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Spectrum Of A Module Category : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Spectrum Of A Module Category : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and gripping novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
