Splitlevel Mind:

The Evolution of Cognitive Maps Ervin Laszlo, 1993 Cognitive maps mental representations which inform thought and action are templates for human perception and behavior Bringing together diverse disciplines cognitive and social psychology biopsychology history physics cosmology chemistry population ecology economics and philosophy of science This volume comprises the revised and updated texts of the majority of papers first given at the international meeting of the General Evolution Research Group held at the U of Bologna Italy in May 1989 The essays explore the development of cognitive maps from their biological and historical bases to their contemporary forms Includes a closing commentary by Umberto Eco Annotation copyright by Book News Inc Portland OR Open Minded Jonathan Lear, 1999-09-01 Freud is discredited so we don't have to think about the darker strains of unconscious motivation anymore We know what moves our political leaders so we don't have to look too closely at their thinking either In fact everywhere we look in contemporary culture knowingness has taken the place of thought This book is a spirited assault on that deadening trend especially as it affects our deepest attempts to understand the human psyche in philosophy and psychoanalysis It explodes the widespread notion that we already know the problems and proper methods in these fields and so no longer need to ask crucial questions about the structure of human subjectivity What is psychology Open Minded is not so much an answer to this question as an attempt to understand what is being asked The inquiry leads Jonathan Lear a philosopher and psychoanalyst back to Plato and Aristotle to Freud and psychoanalysis and to Wittgenstein Lear argues that Freud and more generally psychoanalysis are the worthy inheritors of the Greek attempt to put our mindedness on display There are also he contends deep affinities running through the works of Freud and Wittgenstein despite their obvious differences Both are concerned with how fantasy shapes our self understanding both reveal how life's activities show more than we are able to say The philosophical tradition has portrayed the mind as more rational than it is even when trying to account for irrationality Psychoanalysis shows us the mind as inherently restless tending to disrupt its own functioning And empirical psychology for its part ignores those aspects of human subjectivity that elude objective description By triangulating between the Greeks Freud and Wittgenstein Lear helps us recover a sense of what it is to be open minded in our inquiries into the human soul **A Split-level Mind** June Shipley, 1989-01-01 Performing Blackness Kimberley W.
