Transforming Education in the Gulf Region Khalid Alshahrani,Mohamed Ally,2016-07-01 Countries in the Arab Gulf are currently experiencing some of the fastest rates of growth and progress in the world Transforming Education in the Gulf Region argues that education systems in these countries need to use innovative pedagogies and best practices in teaching and learning to educate all citizens so that they obtain the knowledge and skills to be productive members of society

This book will contribute to the transformation of education in the Gulf countries by suggesting best practices research outcomes and case studies from experts in the Gulf region. It has become increasingly evident in recent years that Gulf countries need to use emerging learning technologies to cater for the needs of learners and to provide maximum flexibility in learning. There is also a growing practical need to use electronic technologies since learning materials are more widely available in electronic formats than in paper based formats. This book focuses on the role of emerging technologies and innovative pedagogies in transforming education in six Gulf countries in the region: Saudi Arabia, United Arab Emirates, Kuwait, Qatar, Oman, and Bahrain. With contributions from experts around the world, the book argues that the time is right for Arab Gulf countries to make the transition to electronic learning and that they need to implement the outcomes of research and adopt best practices to transform and revolutionize education to prepare learners in the Gulf region for the 21st Century. The book should be of interest to academics and students in the areas of higher education, learning technologies, education policy, and education reform. It should also be of interest to educators and policymakers in the Gulf region.

Transforming Teaching and Learning in Higher Education Seng Chee Tan, Shen-Hsing Annabel Chen, 2020-07-07. This book chronicles the journeys of educational researchers and academics who have engaged in research and development to improve teaching and learning at universities. It highlights the research evidence, approaches, and in many cases the journey of transformation rather than prescribing certain principles of and approaches to effective instruction. In other words, it not only describes the destination but also various pathways leading toward it. Further, it focuses on mechanisms for improving the approaches discussed rather than simply determining whether one works better than the other. As such, novice and seasoned academics and teaching staff in higher education will benefit from this book not just from the teaching and learning approaches it highlights but also from the insights into the respective journeys. The research and development methods and approaches discussed here will also appeal to researchers working in teaching and learning in higher education.

Failure to Disrupt Justin Reich, 2020-09-15. From MOOCs to autograders to computerized tutors, technologies designed for large scale learning have never lived up to the hype. Despite its promise, Justin Reich shows that technology cannot transform our classrooms on its own. Successful

education reform he concludes will focus on incremental institutional change not the next killer app
