retention Conduct worldwide training in real time minimizing costs and time Reduce travel while efficiently managing geographically dispersed teams Break down dangerous or complex training procedures into manageable simulations Experts agree that within five years the 3D Internet will become as important to companies as the Web is today Training and Collaboration with Virtual Worlds will put your company ahead of that curve with great results Access the latest information and resources on www.TheVirtualWorldsBook.com Virtual Technologies Jerzy Kisielnicki,2008 This publication presents encompassing research of the concepts and realities involved in the field of virtual communities and technologies Provided by publisher **Working Virtually** Robert Jones,Robert Oyung,Lise Pace,2005 This book provides an in depth practical perspective on the growing dependence of virtual teams and how to best exploit them Provided by publisher **Virtual Communities** Felicia Wu Song,2009 Does contemporary Internet technology strengthen civic engagement and democratic practice The recent surge in online community participation has become a cultural phenomenon enmeshed in ongoing debates about the health of American civil society But observations about online communities often concentrate on ascertaining the true nature of community and democracy typically rehearsing familiar communitarian and liberal perspectives This book seeks to understand the technology on its own terms focusing on how the technological and organizational configurations of online communities frame our contemporary beliefs and assumptions about community and the individual It analyzes key structural features of thirty award winning online community websites to show that while the values of individual autonomy egalitarianism and freedom of speech dominate the discursive content of these communities the practical realities of online life are clearly marked by exclusivity and the demands of commercialization and corporate surveillance Promises of social empowerment are framed within consumer and therapeutic frameworks that undermine their democratic efficacy As a result online communities fail to revolutionize the civic landscape because they create cultures of membership that epitomize the commodification of community and public life altogether **Managing Virtual Teams. collaboration come with challenges that need to be mastered by organizations Project coordination building relationships establishing trust and achieving effective teamwork are only few aspects that differ from conventional teams when considered in detail Teams with multi cultural backgrounds that are geographically dispersed and virtually composed have been in practice and studied for more than three decades Yet managers still struggle with how to get them perform and collaborate properly Bad communication non existing trust and conflicts seem to be the main causes of failure in virtual collaboration The purpose of this research essay is to understand the characteristics of managing virtual teams by analysing relevant literature focused on the areas of building trust and managing conflicts in particular The essay aims to examine the impact and relation that trust and conflict management have with the performance of a team and the group s cohesion
