Nordic Swan Ecolabel and Product Environmental Footprint: Focus on Product Environmental Information Suikkanen, Johanna, Nissinen, Ari, Wesnæs, Marianne, 2019-09-27 The purpose of this report is to compare the Nordic Swan Ecolabel and the Product Environmental Footprint with a focus on environmental information. The report compares the methods used by the Nordic Swan Ecolabel and the PEF to identify the product group specific relevant environmental aspects. The analysis is based on the currently valid Swan Criteria and pilot phase final PEF Category Rules PEFCRs. The report concludes that there are methodological differences in the way product comparisons are made. The report proposes recommendations for both schemes in terms of co-operation and required further work related to the differences in methodological approaches to avoid very different results in what will be considered as an environmentally sound product.

Nordic Swan Ecolabel and Organisation Environmental Footprint: Focus on the organisation environmental information used in the retail sector Salo, Hanna, Suikkanen, Johanna, Nissinen, Ari, 2019-09-27 The Organisation Environmental Footprint OEF initiative of the European Commission and the Nordic Swan Ecolabel both aim at more sustainable consumption and production. We compared the two schemes in relation to their environmental information concerning the retail sector. The Swan aims to push stores to perform better and to help customers make environmental choices, whereas the OEF aims to create a common Life Cycle Assessment based methodology to assess impacts related to a retailer's product portfolio. Overall, the OEF is considered a broader approach still under development, while the Swan is well known in the Nordics. Their scopes, relevant impact categories, and life cycle stages differed. However, climate change, resource use, and biodiversity impacts were significant in both schemes. Possible synergies concern criteria setting, measurement, and communication.

The Nordic Swan - from Past Experiences to Future Possibilities Kristiina Aalto, 2008. This report presents the third evaluation of the Nordic Swan ecolabelling scheme. The evaluation is conducted from the perspective of the public administration and it examines the role of the Nordic Swan in a policy context. Recommendations are presented for authorities in the Nordic countries and for the bodies operating the schemes on a Nordic and national level. The evaluation focuses on current opportunities and challenges in the operating environment of the scheme. It examines the relations between the Nordic Swan and the EU Eco label in the Nordic countries, including their governance procedures, popularity, and reception in the market. Other current topics addressed include the progress achieved by the Nordic marketing strategy for the Swan and some current governance issues in the scheme, including the grounds for public funding for the Nordic Swan. The report also analyses the relations between the Swan and other environmental information systems. In particular, the report investigates the opportunities and challenges ensuing from the current attention to climate issues for
