

The Power of Compounding

Think of compounding as interest on interest, where the money you earn is continually reinvested.

For example, say you invest **\$1,000** today earning 5% interest annually.

With simple interest, you'd have **\$2,500** at the end of 30 years.

With compounding, you'd have more than **\$4,300** at the end of 30 years.
