The New Protectionist Wave:

The New Protectionist Wave Enrico Sassoond,2016-07-27 The book reviews protectionist practices in the United States the European Community and Japan It assesses their causes and effects In coverage depth of analysis and vantage point this is a unique study of the new protectionist trends that began in the 1970s and continued into the 1980s Multilateralism in trade relations is now seriously threatened by the deviant behaviour of the industrial nations the would be pillars of the world trading system set up after World War II The new protectionism exerts strong pressures on the weaker components of the trading system the developing nations Born as an intra developed countries affair the new protectionism has in fact shifted its focus on developing countries threatening the newly found outward orientation of many and making more difficult for all to retain the benefits of export trade

Brazil in the Uruguay Round of the GATT Ricardo Wahrendorff Caldas,2018-12-14 First published in 1998 this volume analyses Brazil s strategy in the Uruguay Round focusing on the issue of services Three different moments were chosen for analysis The first was during discussions before the launch of the Uruguay Round During this period Brazil led the Less Developed Countries LDCs in obstructing the inclusion of services on the agenda The Second was during the launch of the Uruguay Round when Brazil persisted with this policy This second period is referred to as the initial position of Brazil in the Uruguay Round The third was Montreal in 1988 when Brazil supported the principles which guided an agreement on services After this turning point Brazil s position in the Round was increasingly supportive of an agreement not only in services but in all fields

World Agriculture: Towards 2015/2030 Jelle Bruinsma,2017-09-25 This report is FAO s latest assessment of the long term outlook for the world s food supplies nutrition and agriculture It presents the projections and the main messages The projections cover supply and demand for the major agricultural commodities and sectors including fisheries and forestry This analysis forms the basis for a more detailed examination of other factors such as nutrition and undernourishment and the implications for international trade The report also investigates the implications of future supply and demand for the natural resource base and discusses how technology can contribute to more sustainable development One of the report s main findings is that if no corrective action is taken the target set by the World Food Summit in 1996 that of halving the number of undernourished people by 2015 is not going to be met Nothing short of a massive effort at improving the overall development performance will free the developing world of its most pressing food insecurity problems The progress made towards this target depends on many factors not least of which are political will and the mobilization of additional resources Past experience underlines the crucial role of agriculture in the development process particularly where the majority of the population still depends on this sector for employment and income
