

THE NEXT STEP

The Next Step

Elizabeth M. Huff

The Next Step:

The Next Step Life William Clay Smith,2017-08-14 Book regarding taking your Next Step in your walk with Jesus Christ

Nextstep, Volume 2 The Evangelical Catholic,2020-02-20 In Nexstep Volume 2 you are invited to continue your journey of growing in discipleship delving more deeply into the freedom and victory that Jesus provides over every burden and sin that clings to us Hebrews 12 1 You will also discover how the seven sacraments immerse us in the life of Christ and little by little transform us into His likeness

The Conscious Stream Denise Ingebo-Barth,2000-12-01 The Conscious Stream describes a theory built on the idea that consciousness a stream of separate conscious instants like frames making up a reel of film is formed as trajectories circulate around the nervous system circuitry In this model a trajectory is a series of neuron groups energized in turn Picture it as a sequence of lights flashing around a marquee or perhaps as a comet blazing through a linked series of packed neuron groups through circuits of the nervous system When a trajectory passes through the thalamus a central area of the brain an instant of experience is inserted into our lifelong conscious stream This instant of experience can be a sensation thought or feeling The particular instant depends on the source of the trajectory When a trajectory is initiated by sound waves to the ear and passes through the thalamus for example a sensation in this case a sound enters the conscious stream As the description of this model progresses we see how a trajectory from the thalamus to the cortex is recorded and becomes a part of a network of records and how when concurrent trajectories in the cortical network converge and generate a trajectory back to the thalamus a thought enters the conscious stream In addition as trajectories evolve being repeated prolonged released or compounded emotional feelings enter the conscious stream Over time patterns of invigoration and relaxation stagnation and relief are generated forming our life s emotional quality Finally the model shows how links of activity form a cycle and how a pattern of cycles forms an activity Patterns of activities in turn form a lifestyle In this model then the character of circulation in the nervous system reflects emotional fitness Although designed primarily for students of neuroscience this proposed model may also be evaluated by those having an interest in the physical processes underlying emotional fitness
