Tormented Births:

Birth in Kabbalah and Psychoanalysis Ruth Kara-Ivanov Kaniel, 2022-07-05 *Birth in Kabbalah and Psychoanalysis* examines the centrality of birth in Jewish literature gender theory and psychoanalysis thus challenging the centrality of death in Western culture and existential philosophy In this groundbreaking study Ruth Kara Ivanov Kaniel discuss similarities between Biblical Midrashic Kabbalistic and Hasidic perceptions of birth as well as its place in contemporary cultural and psychoanalytic discourse In addition this study shows how birth functions as a vital metaphor that has been foundational to art philosophy religion and literature Medieval Kabbalistic literature compared human birth to divine emanation and presented human sexuality and procreation as a reflection of the sefirotic structure of the Godhead an attempt Kaniel claims to marginalize the fear of death by linking the humane and divine acts of birth This book sheds new light on the image of God as the Great Mother and the crucial role of the Shekhinah as a cosmic womb *Birth in Kabbalah and Psychoanalysis* won the Gorgias Prize and garnered significant appreciation from psychoanalytic therapists in clinical practice dealing with birth trauma postpartum depression and in early infancy distress

Global Rivalries From the Cold War to Iraq Kees van der Pijl, 2006-08-20 This book offers a highly original analysis of world events in the light of the Iraq War It explores the history and development of relations between major countries in the international community and the impact that successive wars and changes in the global political economy have had on the way states relate to each other today Tracing the liberal state structure back to the closing stages of the English Civil War and settlement in North America it argues that the rise of the English speaking West has created rivalries between contender states that are never entirely put to rest With each round of Western expansion new rivalries are created Offering a truly global analysis that covers every area of the world from Europe and America to China the Middle East Latin America and Russia he analyses the development of international relations post WWII and questions whether the neoliberal project and its human rights ideology have collapsed back into authoritarianism under the guise of the war on terror

Literary Optics Maha AbdelMegeed, 2024-02-15 In *Literary Optics* Maha AbdelMegeed offers a compelling and far reaching alternative to the traditional mode of analyzing Arabic literature through an encounter between Arabic narrative forms and European ones Drawing upon close engagements with the works of canonical authors from the period including Hassan Husni al Tuwayrani Muhammad al Muwaylihi Ali Mubarak Francis Marrash and Abdallah al Nadim AbdelMegeed addresses not where these works emanate from but rather how and why they were drawn together to form a canon In doing so she rejects the expectation that these texts through the trope of encounter hold the explanatory key to modern Arabic literature In this reformulation of Arabic literary history AbdelMegeed argues that the canon is forged through an urgency to define a new form of political sovereignty and to make history visible In doing so she explores three pivotal concepts the spectral khayal the trace athar and the collective alnas By examining the texts through these concepts *Literary Optics* provides a remarkable intellectual history that delves into the aesthetic philosophical

and political stakes of nineteenth century Arabic literature

A Woman's Odyssey Into Africa

Hanny Lightfoot Klein, Ellen Cole, Esther D Rothblum, 2020-03-24 Here is the intriguing story of one woman's mid-life flight from her stultified middle class psychologically crippling and unfulfilled existence into a world of high adventure danger hardship and endurance which ultimately leads her to autonomy and recognition In her new book *A Woman's Odyssey Into Africa* Hanny Lightfoot Klein chronicles three year long solo backpacking treks through remote areas of sub-Saharan Africa In the process she discovers the mainsprings of strength within herself as she follows her own drummer finding the courage to face the darkest and most secret convolutions of her own mind She weaves the story of her journey through the men women and children she meets and the dangers and adventures she faces as a lone woman traveler part and parcel of the path she has chosen to take She infuses readers at any stage of life especially women with the courage to do what their individual drummer dictates as she did to find fulfillment in life Lightfoot Klein assures readers in her book Even a life of quiet desperation is not beyond redemption Change starts with a reassessment of the distortions in self image one has been programmed to accept It starts with an inner rebellion a realization that something has been amiss and a desire to set it right if only to leave a better heritage for one's children And then most important of all it begins with a single wild breathless moment where one picks up an unaccustomed load and steps off into the unknown Her message is truly for everyone

The Jātaka or stories of the Buddha's former births. 2 (1895) Edward B. Cowell, 1895 **Birth**, 1917 **Carbon Democracy**

Timothy Mitchell, 2011-11-05 A brilliant revisionist argument that places oil companies at the heart of 20th century history and of the political and environmental crises we now face Guardian A sweeping overview of the relationship between fossil fuels and political institutions from the industrial revolution to the Arab Spring Financial Times Oil is a curse it is often said that condemns the countries producing it to an existence defined by war corruption and enormous inequality Carbon Democracy tells a more complex story arguing that no nation escapes the political consequences of our collective dependence on oil It shapes the body politic both in regions such as the Middle East which rely upon revenues from oil

production and in the places that have the greatest demand for energy Timothy Mitchell begins with the history of coal power to tell a radical new story about the rise of democracy Coal was a source of energy so open to disruption that oligarchies in the West became vulnerable for the first time to mass demands for democracy In the mid twentieth century however the development of cheap and abundant energy from oil most notably from the Middle East offered a means to reduce this vulnerability to democratic pressures The abundance of oil made it possible for the first time in history to reorganize political life around the management of something now called the economy and the promise of its infinite growth The politics of the West became dependent on an undemocratic Middle East In the twenty first century the oil based forms of modern democratic politics have become unsustainable Foreign intervention and military rule are faltering in the Middle East while governments everywhere appear incapable of addressing the crises that threaten to end the age of carbon democracy the disappearance of cheap energy and the carbon fuelled collapse of the ecological order In making the production of energy the central force shaping the democratic age Carbon Democracy rethinks the history of energy the politics of nature the theory of democracy and the place of the Middle East in our common world
